# Media search. TIP

VITA

The screenshot shows the VITA Media database search interface. At the top left, the VITA logo and 'Media database' are displayed. On the right, there are links for 'Contact & support', 'Change password', and 'English'. A search bar contains the text 'Picture from 10805'. Below the search bar, a dropdown menu lists search suggestions: 'picture', 'pictures', 'from', '10805', and '108050'. A red information icon (i) is positioned to the left of a white tip box. The tip box contains the following text: 'TIP for the image search: Search for images using the search term "Picture from" and the print number of the brochure, e.g. 10805: Picture from 10805 Confirm with Return. All images in the brochure – if available – will be displayed.' The background shows a grid of search results, including images of dental products like Vita VMW and Vita VMWc, with a 'PSD' button overlaid on each.

# Media selection and activities

Select this asset for download or to add to a collection. Multiple assets can be selected in the gallery.

Direct download of the original file.

Directly add the file to a collection.

If the "selection checkmark" is set in the window, the options for downloading the (original) file, as well as for adding the original to a collection, appear again in the upper right corner.

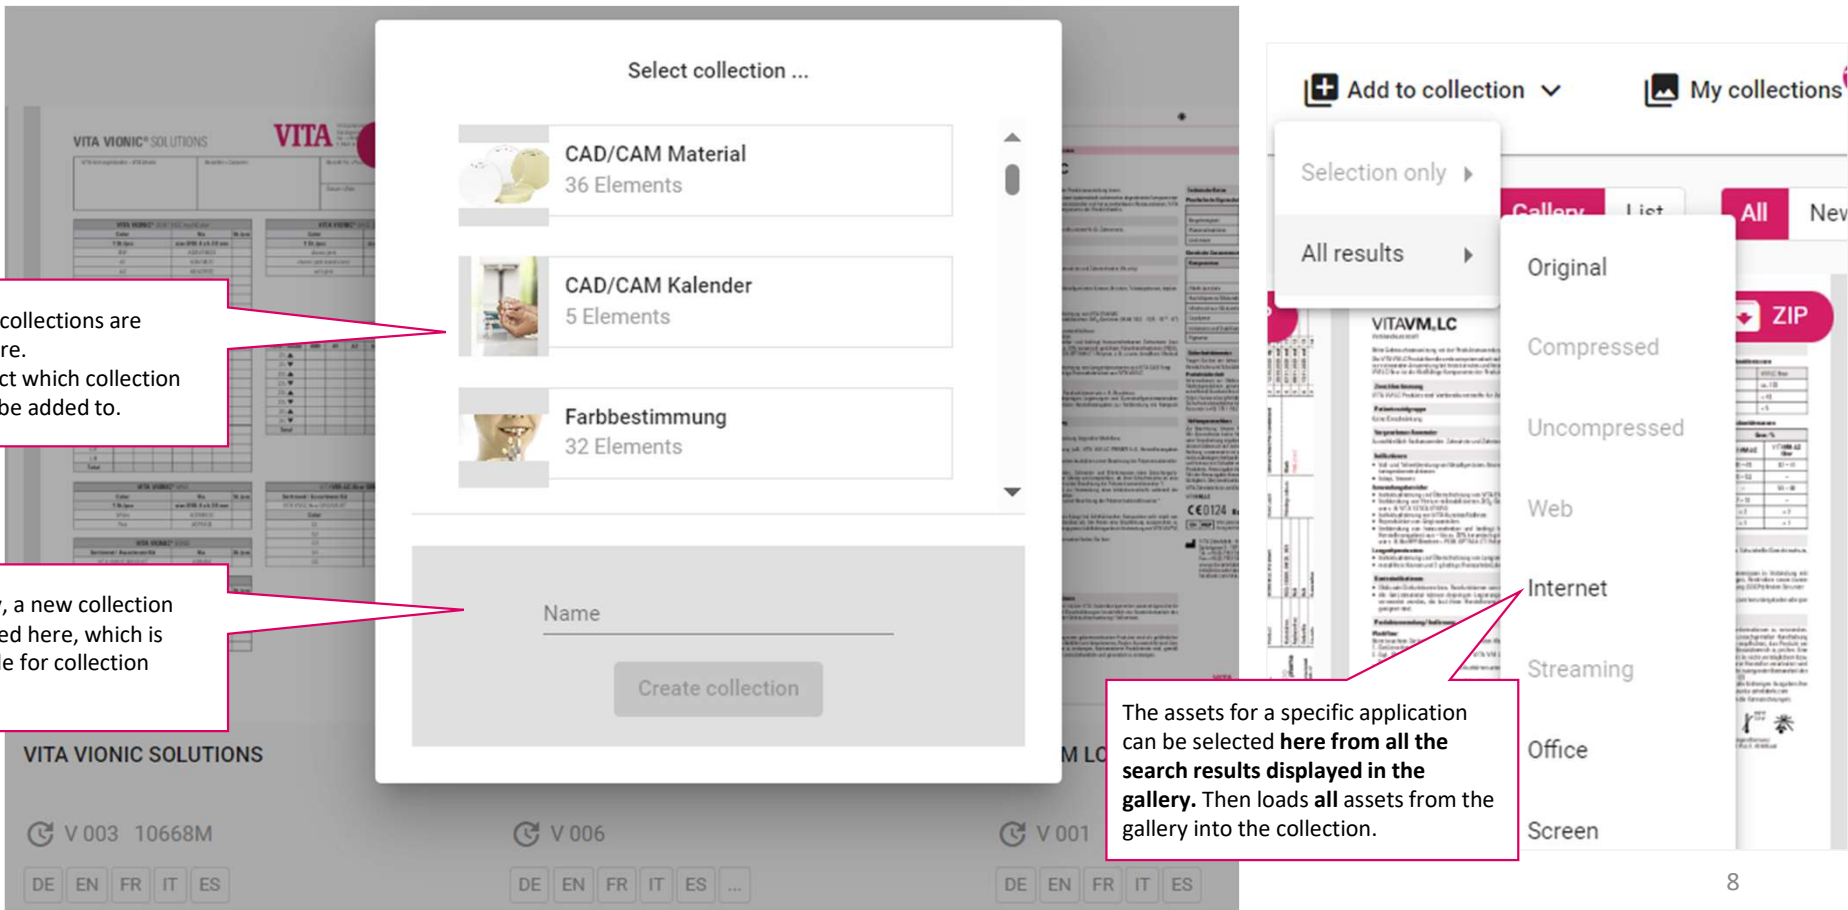

# Collection selection

1

All available collections are displayed here. You can select which collection the file is to be added to.

2

Alternatively, a new collection can be created here, which is then available for collection selection.

The assets for a specific application can be selected here from all the search results displayed in the gallery. Then loads all assets from the gallery into the collection.

# Media information. Detailed view

My collections / Test Kollektion 

5 Elements

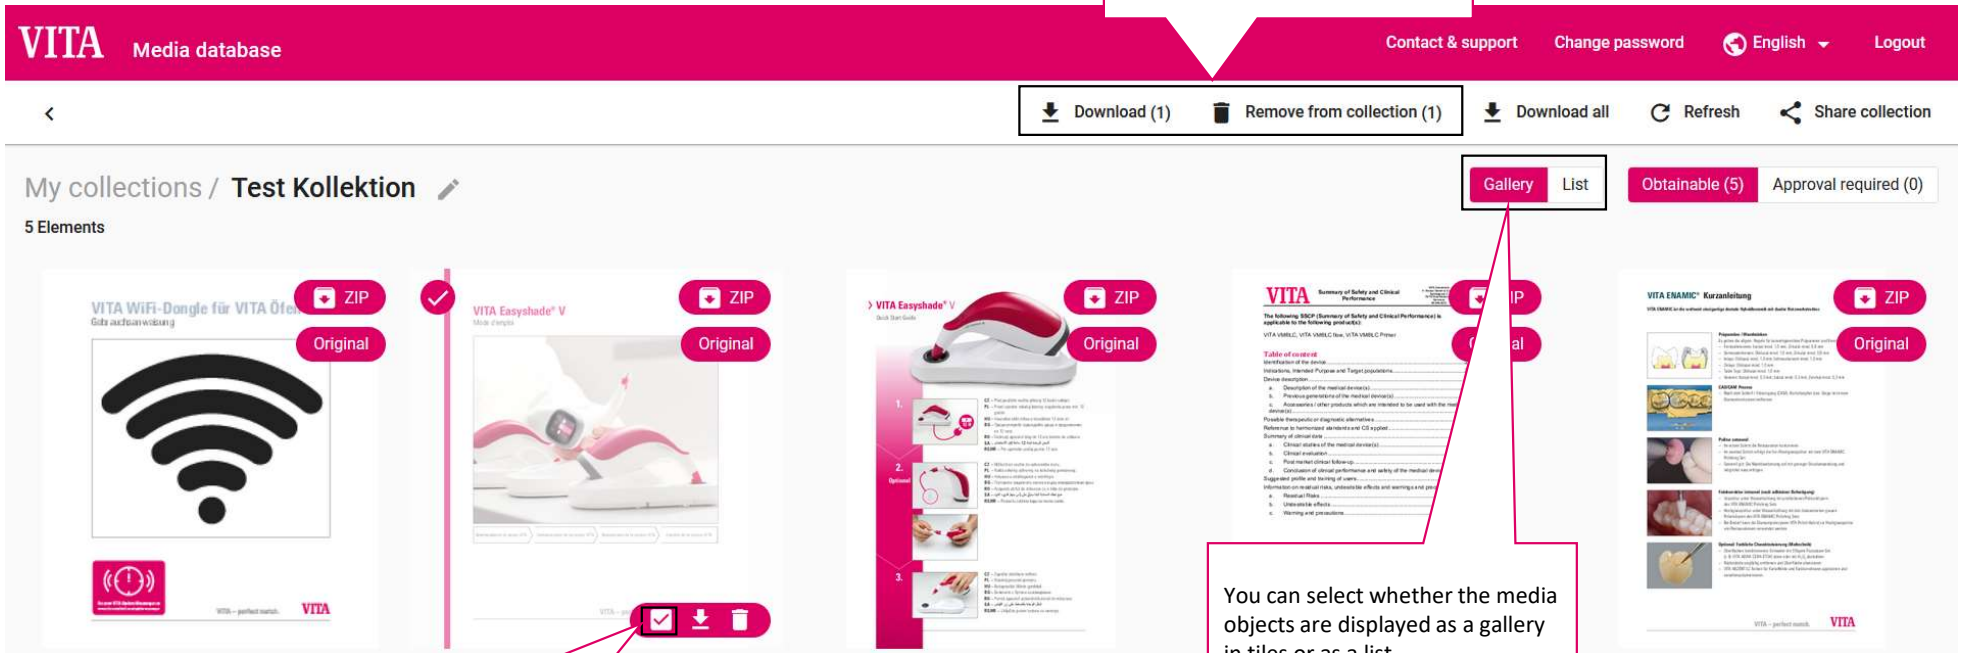

**3** Individual media objects can also be selected, downloaded or deleted here.

# Postprocessing a collection

**i Use Case:** only selected media objects from a collection are to be downloaded or deleted.

2 The selected / marked media objects can be downloaded or removed from collection here.

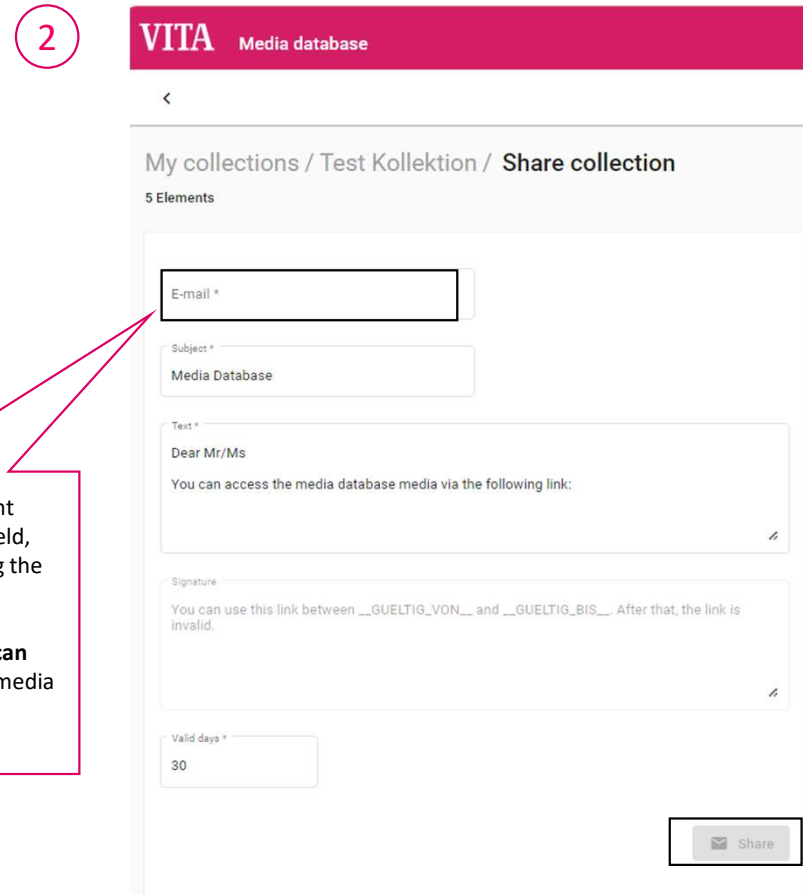

1 The desired media objects can be selected here (multiple selection possible).

You can select whether the media objects are displayed as a gallery in tiles or as a list.

# Share collections

Within a collection, a click on "Share collection" opens the adjacent mask.

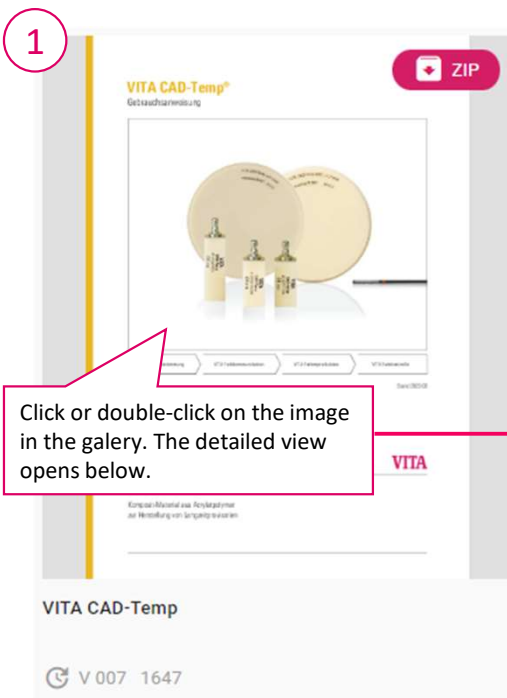

After filling in the desired recipient email address, subject and text field, the collection can be shared using the lower right button "Share".

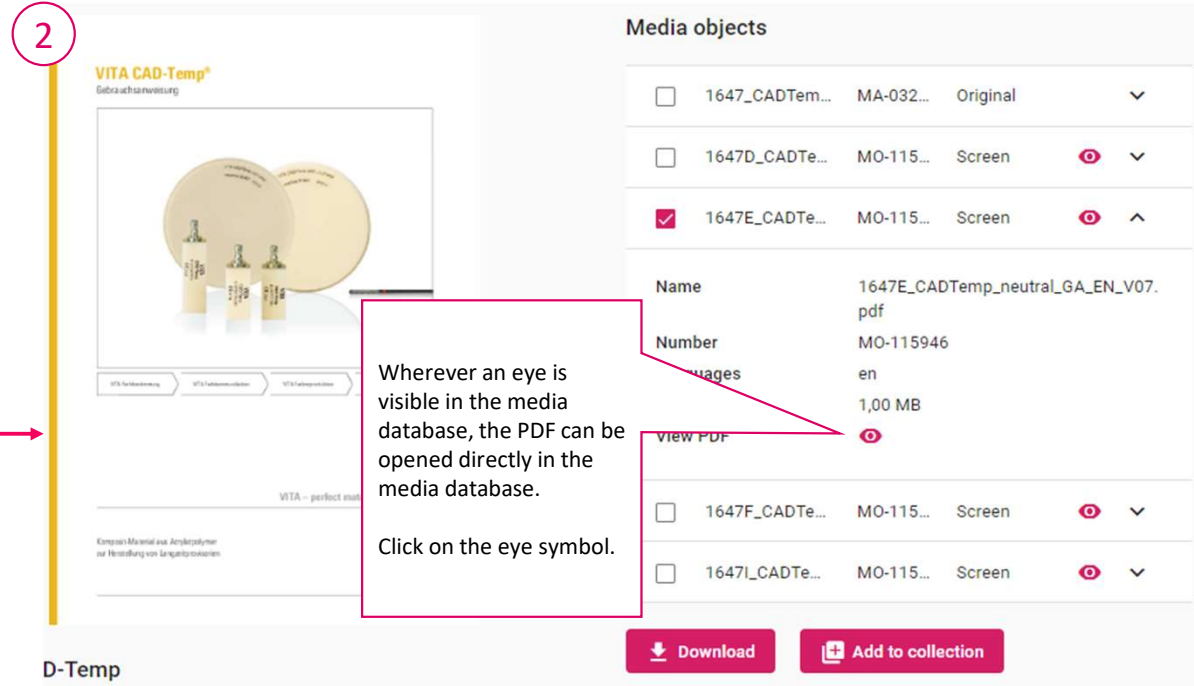

A link will be sent. **The recipient can open the link** and download the media **without logging in** to the media database.

# Open Document Viewer

 **Attention:** The Document Viewer can only be used for PDF files. Therefore, select the detailed view for brochures that are in ZIP format (as other languages are included). The "eye" symbol appears there for viewing in the Document Viewer.

Click or double-click on the image in the gallery. The detailed view opens below.

Wherever an eye is visible in the media database, the PDF can be opened directly in the media database.

Click on the eye symbol.

**THE SHADE CONCEPT**  
Materials with a single color (monoColor) or four color layers (multiColor) are available.

	1M1T*	1M2T	2M2T	3M2T
CAD-Temp monoColor				
CAD-Temp multiColor				

\* For the reproduction of bleached teeth only possible in size C1-40

**Preparation guidelines**  
Since VITA CAD Temp restorations normally provide the basis for definitive all ceramic restorations, the standard guidelines for the preparation of all ceramic restorations must be observed. For detailed information, see the brochure "Clinical Aspects of All Ceramic Crowns".

**Benefits**

- The material is suitable for restorations with a clinical wearing period of up to three years.\*
- Homogeneous material due to innovative manufacturing process
- Well balanced combination of mechanical properties such as tensile strength and elasticity, for clinical use and the specific indication.
- Excellent abrasion resistance (see literature).
- Translucency and fluorescence based on natural dentition.
- Biodeposque
- Good polishing characteristics.
- Can be individualized with the light curing VITA VM LC and VITA VM LC flow microparticle composite.
- Can be characterized with shades using VITA AKZ/NT LC

**Functions of temporary restorations made from VITA CAD-Temp**

- Prophylactic functions:**
  - avoiding the movement of abutment teeth
  - protecting the tooth substance against bacterial, toxic and thermal effects
- Diagnostic and esthetic functions:**
  - checking occlusion
  - checking phonetics
  - checking the vertical dimension
  - checking the esthetic result
- Therapeutic functions:**
  - gingival forming for controlled papillary growth for later implementation in all ceramic restorations
  - restoring implants during the healing phase
  - correction of temporomandibular joint disorders
  - correction of the occlusal plane

VITA CAD-TEMP monoColor and VITA CAD-TEMP multiColor consists of a unique fiber free, homogeneous, high molecular and cross linked acrylate polymer with microparticle filler, or MIP material.

With the MIP material (Microfiller Reinforced Polyacrylic) developed by VITA, inorganic microparticles are polymerized into the network, and a homogeneous material with high abrasion resistance is created using the VITA pressing process.

**Physical properties**

Properties	Unit	Value*
Flexural strength	MPa (N/mm <sup>2</sup> )	>80
Modulus	MPa (N/mm <sup>2</sup> )	approx. 2800
Soltering temperature (DSC)	°C	approx. 110
Inorganic filler content	Wt%	approx. 14
Water absorption	complies with EN ISO 10477 Polymer based crown and bridge materials	
Solubility	complies with EN ISO 10477 Polymer based crown and bridge materials	
Shade stability	complies with EN ISO 27117 Artificial teeth for dental prostheses	

\* The technical/physical values are typical measuring results and refer to internal samples and measurement equipment available on site. If samples are prepared using different methods and measurement equipment, other measuring results may be produced.

**Patient target group**  
No restrictions

**Intended user**  
Dental professionals only; dentist and dental technician (Rx only).

**Indication and processing requirements**  
VITA CAD-Temp is used for the fabrication of multi unit, fully or partially anatomical long term temporary bridge restorations with a span of up to two pontics and a clinical wearing period of up to three years. For CAD/CAM system requirements, please refer to the information provided by the manufacturer of the respective system.

Indication	Anterior crown	Posterior crown	Anterior bridge*	Posterior bridge*
VITA CAD-Temp	●	●	●	●

● recommended \* Only temporary bridges are recommended for wearing periods of more than six months.

**Contraindication**  
Permanent restorations with a clinical wearing period of more than three years. In patients who are allergic to PMMA.
