

Additional shades for VITAPAN PLUS

From October 2012, the range of shades available for the VITAPAN PLUS anterior line will be extended. This modern anterior line, a customer-oriented enhancement of the popular classic VITAPAN, will be available from October for the entire VITA classical A1-D4 shade range, as well as in ten shades for VITA SYSTEM 3D-MASTER.

VITAPAN PLUS is recommended for any indication and any prosthetic specialist, regardless of whether restorations are comprised of total, implant or investment cast prosthetics, and regardless of whether joint prosthetics, telescope restorations or cone constructions are planned. This innovative tooth line is available in ten anterior sets for the upper jaw and five anterior sets for the lower jaw, and can be combined with all VITA posterior tooth lines, including VITA PHYSIODENS, VITA LINGOFORM, VITAPAN CUSPIFORM and VITAPAN SYNOFORM. The shade range already includes the ten VITA classical A1-D4 shades A1, A2, A3, A3.5, A4, B2, B3, C2, D3 and D4, and is set to be supplemented by five additional VITA classical shades B4, C1, C3, C4 and D2, giving the user the entire VITA classical shade range to choose from. From October, the ten most common VITA SYSTEM 3D-MASTER shades will also be available: 1M1, 2L1.5, 2M1, 2M2, 3L1.5, 3L2.5, 3M2, 3R2.5, 4M2 and 5M1.

VITAPAN PLUS impresses with natural reflection of light thanks to an authentic surface morphology and unique mamelon structure. And the perfect balance between opalescence, luminescence and translucency, for example, ensures a play of colors rich in nuances, resulting in overall esthetics far beyond usual standards.

Users of the compact VITAPAN PLUS anterior line will soon be able to choose from the entire VITA classical A1-D4 shade range, as well as from ten VITA SYSTEM 3D-MASTER shades. Offering the perfect combination of functionality and esthetics, this innovative anterior tooth supports you in the efficient fabrication of superior quality prosthetics.
