

VITA VM – the veneering concept for unlimited creativity

The VITA VM veneering concept for metal ceramics, all-ceramics and resins meets the highest demands on quality – but nothing is so good that it cannot be improved.

Even more flexibility could be achieved with the help of users' request so that dental ceramists can benefit from an unsurpassed range of technical and creative options!

Superior user-friendliness is increased by enhanced processing characteristics of VITA VM 7, VM 9 and VM 13 in the shade of VITA SYSTEM 3D-MASTER. Improvements that could be accomplished and were also successfully integrated into the VITA classical A1-D4 shades, include the modelling properties and the firing and shrinkage behavior. Additionally, the shade accuracy was enhanced to that top-precision restorations with natural refraction and reflection behavior can be fabricated.

Moreover, VITA VM 9 was matched with the new VITA In-Ceram YZ Coloring Liquids and VITA VM 7 was matched with the two new VITA In-Ceram glasses. VITA VM 7 will include the modifications described above and will be available from June 1, 2011.

Moreover, new components to achieve natural light-reflecting properties were added to VITA VM 7, VM 9 and VM 13: almost natural transmission of light in the incisal or translucent area can be achieved and the shade can be matched to that of residual teeth more easily.

The three additional VITA VM 13 SUN Opaque materials excel by their shade-bearing characteristics and excellent masking capacity

and are simply mixed with the available opaque materials.

For more information about the VITA VM family, which offers ceramists even more flexibility thanks to almost unlimited technical and creative options, go to www.vita-zahnfabrik.com or call the VITA Hotline at + 49 - 7761-562 222.

VITA Zahnfabrik H. Rauter GmbH & Co. KG

Headquartered in Bad Säckingen/Germany, VITA Zahnfabrik H. Rauter GmbH & Co. KG has been developing, producing and marketing innovative solutions for dental prosthetics according to consistently high quality standards for over 85 years, and has been known from the very beginning as a pioneer and worldwide trendsetter. The VITA shade standard, for instance, is recognised internationally in the dental branch as a shade reference system. Users in 120 different countries benefit from the comprehensive range of products and services provided by VITA Zahnfabrik. These include analogue and digital tooth shade determination systems, acrylic and ceramic teeth, veneering and framework materials for conventional and computer-aided manufacturing procedures, dental equipment as well as a wide range of service and training facilities.
