VITA Easyshade® V

Optimum shade determination. Maximum reliability.

Product description

The VITA Easyshade V digital spectrophotometer was developed for precise, fast and reliable shade determination of natural teeth and ceramic restorations. A range of application programs also make it possible to monitor bleaching treatments, for example, and are an important communication tool used with patients.

Features/Benefits

Efficient

Easy and accurate shade determination in seconds.

Versatile

Can be used on natural teeth, ceramic restorations and for planning bleaching treatments.

Reliable

More efficient process and communication between practice and dental laboratory.

VITA Easyshade® V

- Spectrophotometer, measurement range 400 - 700 nm
- Inductive charging concept with long-life AA batteries
- Output of all tooth shades in the established standard shade systems VITA classical A1-D4 and VITA SYSTEM 3D-MASTER, as well as indication of the VITABLOCS shades and bleached index, in accordance with the American Dental Association
- Display of lab and LCh values
- Bluetooth interface for wireless communication with the VITA Assist PC software and VITA mobileAssist app

VITA Easyshade® LITE

The One-Click Shade Guide.

Product description

The VITA Easyshade LITE enables easy and fast digital shade determination for natural teeth, using the proven VITA classical A1-D4 and VITA SYSTEM 3D-MASTER shade systems.

Features/Benefits

Fast

Results in seconds for efficient processes.

Easy

Digital shade determination with one-click operation, without prior or background knowledge.

Precise

High-precision spectrophotometer technology ensures exact tooth shade measurement and a reliable process

VITA Easyshade® LITE

- Spectrophotometer, measurement range 400 - 700 nm
- Output of all tooth shades in the established standard shade systems VITA classical A1-D4 and VITA SYSTEM 3D-MASTER
- 2x AA batteries

VITA Assist

PC Software zur Kommunikation von Zahnfarben

Product description

The VITA Assist software currently combines the **VITA ShadeAssist** and **VITA ToothConfigurator** modules.

With VITA Assist, tooth shades determined by the VITA Easyshade are recorded and communicated professionally. The Windows-based PC software combines digital patient photos with all relevant patient tooth shade information. At the same time, it allows for the case documentation and provides the basis for intensive exchange between the dental practice and laboratory.

VITA Assist. Professional tooth shade communication and documentation for the dental practice and laboratory

VITA Assist actively supports the selection of appropriate CAD/CAM materials, in the layering of ceramic restorations and in the fabrication of complex restoration solutions, even for the most difficult cases. You will benefit from features such as:

- Wireless transmission of VITA Easyshade data
- Professional post-processing of patient photos for optimum documentation
- Integration option for digital X-ray images, detailed photos and contour images
- Versatile comment functions
- Active support functions for the selection of the most appropriate materials for each individual case

VITA ShadeAssist

- **Perfect interface** between the dental practice and laboratory
- **Allows the shade to be communicated without errors**
- In doing so, it **minimizes the costs** for sustainable shade determination and corrections

VITA ToothConfigurator

- **Interactive consultation module**
- **Includes the patient** in planning the implant

VITA classical A1-D4® shade guide

The original for the PERFECT MATCH in your choice of color.

Product description

The VITA classical A1 – D4 shade guide serves to accurately determine tooth shade. The arrangement of the shades in the VITA classical family of shades is as follows:

A1 - A4 (reddish-brownish), B1 - B4 (reddish-yellowish), C1 - C4 (greyish shades), D2 - D4 (reddish-grey)

Features/Benefits

Convenient

The handy shade guides enable precise tooth shade measurements in just a few steps.

Fast

Using standardized shade samples, the tooth shade can be visualized very quickly for the patient.

Efficient

The reference shade samples make it easy to check the shade fidelity of restorations.

Content

VITA classical A1-D4® shade guide

Prod. no. G027C

VITA classical A1-D4 shade guide with VITA Bleached Shades

The shade guide for determining tooth shade, including bleached shades.

Product description

VITA Bleached Shades provide dentists with a practical tool for reliably determining bleached shades. With the additional VITA Bleached Shades, bleached tooth shades are now also available with this original shade guide.

The VITA Bleached Shades consist of the bleached shades 0M1, 0M2 and 0M3 (VITA SYSTEM 3D-MASTER). The Bleached Shades, including holders, are available separately and can also be used to retrofit the VITA classical A1 - D4 shade guide and the VITAPAN classical.

Features/Benefits

Convenient

The handy shade guides enable precise tooth shade measurements in just a few steps.

Fast

Using standardized shade samples, the tooth shade can be visualized very quickly for the patient.

Efficient

The reference shade samples make it easy to check the shade fidelity of restorations.

VITA Toothguide 3D-MASTER®

The premium solution for systematic determination of all tooth shades.

Product description

By structuring the shade samples according to brightness, intensity and hue, the VITA Toothguide 3D-MASTER makes it possible to systematically and reliably determine all tooth shades.

Features/Benefits

- Determination of the tooth shade in 3 steps
- Unmistakable determination of the tooth shade
- Possibilities of comparison: Yes/No - Better/Worse decision
- Tooth shades precisely defined by science (miscible)
- Can be learned

Description	Prod. no.
VITA Toothguide 3D-MASTER with BLEACHED SHADES	G360

VITA Bleachedguide 3D-MASTER®

The shade guide for monitoring bleaching treatments.

Product description

The VITA Bleachedguide 3D-MASTER is the shade guide for monitoring bleaching treatments. With its easy-to-read classification of brightness levels, the VITA Bleachedguide 3D-MASTER is the recommended tool for communicating with patients in any practice that performs bleaching.

Features/Benefits

Clear communication

The clear arrangement according to brightness levels helps facilitate clear communication between dentist and patient.

Precise brightness levels

The 29 defined brightness levels make it possible to accurately capture even the finest brightness nuances and make them visible to the patient.

Recognized worldwide

Use of this bleaching guide is recommended by the American Dental Association (ADA).

VITA

VITAPAN EXCELL® Anterior

The premium anterior teeth for natural-looking dentures.

Product description

VITAPAN EXCELL is an anterior tooth made of MRP composite that has an impressive, balanced overall composition, combining esthetic criteria such as natural shapes, good light transmission and a vibrant play of shades. This prefabricated tooth is exceptionally suited for highly esthetic complete, partial and implant-retained dentures.

Features/Benefits

Truly natural

The wide range of shapes and shades provides absolute freedom of choice and individuality.

Truly lifelike

The balanced light transmission results in true-to-life light dynamics. Natural fluorescence always comes from within the tooth, which is also the case with VITA premium teeth.

Truly strong

The VITA premium teeth made of high-quality MRP composite combine durability, improved polishing characteristics and natural esthetics.

Characteristics

- lifelike three-dimensional tooth geometry
- distinctive incisal characteristics
- wide palatal bars
- pronounced enamel portion
- elaborate surface structure
- integrated mamelon/opalescence
- 3D layered structure for natural shade gradient

Indications

- Full dentures
- Partial dentures
- Temporary dentures
- Implant-borne prostheses
- Telescopic and conus restorations
- Attachments and model casting prostheses

prosthetics concepts

Can be ideally combined with VITAPAN LINGOFORM posterior teeth for all common prosthetic concepts of lingual and balanced occlusion: e.g. according to Gysi, according to Prof. A. Gerber, according to APF/TIF, according to ABC.

Shades and Sets

29 x VITA SYSTEM 3D-MASTER® shades: 0M1, 0M2, 0M3, 1M1–5M3

16 x VITA classical A1–D4® shades A1–D4

- 21 x upper anterior moulds (divided into four mould groups)
- 6 x lower anterior moulds

VITAPAN EXCELL® Anterior kits

VITAPAN EXCELL tooth storage

- X-small: 67 Sets / 402 Anteriors
- Small: 134 Sets / 804 Anteriors
- Medium: 268 Sets / 1608 Anteriors
- Large: 400 Sets / 2400 Anteriors

Available in the VITA classical A1–D4® and VITA SYSTEM 3D-MASTER® shades.

We are also happy to create a tooth storage system according to your individual specifications.

VITAPAN EXCELL mould chart:

Case with all moulds of VITAPAN EXCELL for selecting teeth.

VITAPAN® LINGOFORM Posterior

The Premium posterior teeth combine function and esthetics.

Product description

VITAPAN LINGOFORM is a contoured posterior tooth made of MRP composite that perfectly combines function and esthetics. The occlusal surfaces in the lower jaw have a functional cusp inclination. In the upper jaw, the slightly deeper occlusal surface reliefs are modeled after nature without impairing the function.

Features/Benefits

Truly functional

Functionally designed occlusal areas promote optimal static alignment of the dentures, protect the tooth substance and offer a high level of comfort.

Truly simple

VITAPAN LINGOFORM is suitable for all setup concepts, including lingualized occlusion. The VITA Easy Centric principle facilitates a simple and intuitive setup with automatic centering.

Truly esthetic

The multiple layers and nature-identical surface morphology create a vibrant and harmonious light reflexive properties.

Characteristics

- three-dimensional tooth geometry with natural lingobuccal dimension
- multifunctional occlusal surface design with defined centric contacts
- finely nuanced surface texture for natural play of light
- maxillary cusp angle: approx. 15° to 20°

Indications

- Full dentures
- Partial dentures
- Temporary dentures
- Implant-borne prostheses
- Telescopic and conus restorations
- Attachments and model casting prostheses

prosthetics concepts

Suitable for all established concepts of lingual and balanced occlusion: e.g. according to Gysi, according to Prof. A. Gerber, according to APF/TIF, according to ABC. Especially suitable for lingualized occlusal concepts.

Shades and Sets

29 x VITA SYSTEM 3D-MASTER® shades 0M1, 0M2, 0M3, 1M1–5M3

16 x VITA classical A1–D4® shades A1–D4

- 4 x upper posteriores moulds
- 4 x lower posteriores moulds

VITAPAN® LINGOFORM Posterior kits

VITAPAN LINGOFORM tooth storage

- X-small: 50 Sets / 400 Posteriors
- Small: 100 Sets / 800 Posteriors
- Medium: 200 Sets / 1600 Posteriors
- Large: 300 Sets / 2400 Posteriors

Available in the VITA classical A1–D4® and VITA SYSTEM 3D-MASTER® shades.

You will receive the most frequently used moulds and shades with the packaged tooth storage. We are also happy to put together storage systems according to your individual specifications.

VITAPAN LINGOFORM mould chart:

VITA PHYSIODENS®

The premium teeth for lifelike dentures.

Product description

VITA PHYSIODENS are premium denture teeth made of MRP composite with intricate, lifelike moulds and a lively play of light for harmonious integration into the remaining dentition.

Features/Benefits

Lively play of light

Lively play of light through elaborate surface texture.

Natural morphology

Simple restoration of natural chewing function, thanks to occlusal surfaces with natural morphology.

Reliable

Reliable masking of secondary/tertiary structures, thanks to high (basal) tooth volume.

Exceptional durability

Due to high load capacity and abrasion stability.

Characteristics

- natural three-dimensional tooth geometry for good integration in the remaining dentition
- lifelike, distinctive incisal characteristics and natural labial curvature
- broad tooth neck for ideal interdental space / papilla modeling
- high (basal) volume for masking of secondary/tertiary structures
- elaborate surface texture for natural play of light and detailed fissure design
- 3D-layered structure for natural shade gradient
- occlusal surfaces/cusp relief according to the natural, fully anatomical template (Maxillary cusp angle: approx. > 30°)

Indications

- Full dentures
- Partial dentures
- Temporary dentures
- Implant-borne prostheses
- Telescopic and conus restorations
- Attachments and model casting prostheses

prosthetics concepts

Especially suited for: BLP (BIO-Logical Prosthetic) according to Dr. E. End.

Shades and Sets

Anterior

28 x VITA SYSTEM 3D-MASTER® shades 0M1, 0M3, 1M1–5M3

16 x VITA classical A1–D4® shades A1–D4

– 21 x upper anterior moulds (divided into four mould groups)

– 8 x lower anterior moulds

Posterior

28 x VITA SYSTEM 3D-MASTER® shades 0M1, 0M3, 1M1–5M3

16 x VITA classical A1–D4® shades A1–D4

– 6 x upper posteriores moulds

– 6 x lower posteriores moulds

VITA PHYSIODENS® kits

VITA PHYSIODENS tooth storage Anterior:

- X-small: 67 Sets / 402 Anteriors
- Small: 134 Sets / 804 Anteriors
- Medium: 268 Sets / 1.608 Anteriors
- Large: 400 Sets / 2.400 Anteriors

VITA PHYSIODENS tooth storage Posterior:

- X-small: 50 Sets / 400 Posteriors
- Small: 100 Sets / 800 Posteriors
- Medium: 200 Sets / 1.600 Posteriors
- Large: 300 Sets / 2.400 Posteriors

Available in the VITA classical A1–D4® and VITA SYSTEM 3D-MASTER® shades.

You will receive the most frequently used moulds and shades with the packaged tooth storage. We are also happy to put together storage systems according to your individual specifications.

VITA PHYSIODENS mould chart:

VITAPAN®

The age-appropriate universal teeth.

**Product description**

VITAPAN Anterior are age-appropriate, universal anterior teeth made of MRP composite.

VITAPAN CUSPIFORM Posteriores are delicate posterior teeth with pronounced occlusal surface relief.

VITAPAN SYNOFORM are slender posterior teeth with flat occlusal surface relief for gerontoprosthetics.

Features/Benefits**According to age**

Multifaceted shapes enable the fabrication of age-appropriate full/partial dentures.

Natural shade effects

Integrated 3D-shade gradient from the cervical to the incisal area.

Natural morphology

Simple restoration of natural chewing function, thanks to occlusal surfaces with natural morphology.

Exceptional durability

Due to high load capacity and abrasion stability.

Indications

- Full dentures
- Partial dentures
- Temporary dentures
- Implant-borne prostheses
- Telescopic and conus restorations
- Attachments and model casting prostheses

prosthetics concepts

Suitable for all established concepts of lingual and balanced occlusion: e.g. according to Gysi, according to Prof. A. Gerber, according to APF/TIF, according to ABC.

VITA MFT®

Amazing efficiency and compelling quality: The VITA denture tooth with Easy Centric.

Product description

Anterior and posterior teeth made of HC polymer material with multifunctional occlusal surfaces for solid standard dentures.

Features/Benefits

Saves time

Simple and efficient setup, thanks to VITA Easy Centric principle. Suitable for all common setup techniques.

Saves money

Multifunctional, economic denture tooth in a large range of shades and shapes. Available in 16 VITA SYSTEM 3D-MASTER shades and 16 VITA classical A1-D4 shades.

Reduces stress

Reliable and rapid results with compelling quality for you and your patients.

prosthetics concepts

Suitable for all established concepts of lingual and balanced occlusion: e.g. according to Gysi, according to Prof. A. Gerber, according to APF/TIF, according to ABC

Especially suited for: lingualized and buccal occlusal concepts

Characteristics

Mould

- universal tooth geometry with natural shape
- multifunctional occlusal surface design with predefined contact points
- attractive, natural incisal design

Special features

- balanced enamel-dentine ratio for a natural play of light
- nuance-rich surface texture with integrated mamelons
- 3D-layered structure for natural shade gradient
- maxillary cusp angle: approx. 15° to 20°

Indications

- solid standard provision for full/partial dentures

VITACOLL® bonding agent

For reliable bonding of denture tooth and base.

Product description

VITACOLL ensures reliable bonding of denture teeth to denture base materials. Since a wide range of different denture base materials is used, it is frequently difficult for the responsible dental technician to determine whether these materials provide perfect bonding to the denture teeth available. By using VITACOLL, the required certainty is ensured.

Features/Benefits

Reliable

The use of VITACOLL Bonding Agent results in reliable chemical bonding of denture teeth to hot and cold curing polymerizates as well as polymethacrylate injection molding materials and prevents teeth from breaking out of the denture base.

VITAFOL[®] H silicone separating film

For separating teeth in wax set-ups.

Product description

VITAFOL H is a silicon material which protects denture and ceramic teeth during denture fabrication.

Features/Benefits

Protects

VITAFOL H protects denture and ceramic teeth. Extremely accurate modellations of the gingiva margin can be retained during devesting and areas that are covered with VITAFOL H remain clean and do not need to be finished.

Efficient

Areas that are covered with VITAFOL H do not need to be separated towards the plaster material. Accordingly no separating agent can reach the basal surfaces of the teeth. In the case of denture teeth, a separating layer between teeth and base material can be avoided.

Gentle

Damage during pressing and devesting is avoided through the buffer effect of VITAFOL H.

Teeth cabinet vario

For perfect storage of sets of teeth.

Product description

The VITA tooth cabinet which features comprehensive storage options and requires only little space is perfectly suitable to store all VITA tooth stocks.

Features/Benefits

Flexible

By integrating additional drawers, the cabinet system can be expanded; it consists of a high-quality, resistant and neutral light-grey plastic material.

Smoothly running

The cabinet features smoothly running drawers and rail guides on both sides for complete pull-out.

Compatible

The VITA tooth cabinet vario is a component of the VITA modular box system and thus compatible with all modular boxes.

Content

Maximum storage per drawer:

72 x 6 = 432 Anteriors in sets of 6 teeth

48 x 8 = 384 Posteriors in sets of 8 teeth

VITA VIONIC® DENT DISC multiColor

Composite disc for milling tooth elements for final full and partial dentures

Product description

VITA VIONIC DENT DISC multiColor, is an MRP composite disc made of inorganically filled PMMA material, for milling tooth elements for removable full and partial dentures. The composite disc is impressive with its material properties and the quality of VITA premium denture teeth.

Features/Benefits

Material quality.

Abrasion resistant for durable denture teeth.

Esthetics.

Integrated shade gradient for a more natural effect. Good polishing characteristics.

Flexibility.

Simple, safe processing. Compatible with conventional milling systems.

Indications

VITA VIONIC DENT DISC multiColor are composite discs for milling tooth elements for removable partial and full dentures.

Shades

VITA classical A1–D4®-/Bleach shades: 0 M1, 0 M3, A1, A2, A3, A3.5, A4, B1, B2, B3, B4, C1, C2, C3, C4, D2, D3, D4

Geometry

Pack contains one piece

Ø 98.4 x h 20 mm

System compatibility

Suitable for all **open milling units** that support universal discs.

VITA VIONIC DENT DISC multiColor has been validated with the following system partners:

VITA VIONIC VIGO®

The specialist for full digital dentures.

Product description

VITA VIONIC VIGO is a completely new generation of teeth made of an SE polymer composite with a design perfected for the digital fabrication of dentures.

Features/Benefits

Esthetics.

Three-dimensional shade layering and lifelike shapes.

Material quality.

Premium teeth with impressive material properties.

Process reliability.

Tooth design perfected for the digital workflow. Greater productivity, thanks to an efficient workflow.

Not available in all markets. Official approval pending in some markets.

Characteristics

- natural, three-dimensional tooth design for a natural appearance and very good function
- reduced tooth dimensions, pre-conditioned adhesive surfaces and undercut-free basal design for efficient digital processing
- conical-oval tooth neck shape with integrated anti-rotation protection for correct positioning and precise, adhesive bonding
- automatic tooth system and controlled centric finding, thanks to predefined contact points and a functionally optimized easy centric design
- good light dynamics with exceptional translucency, opalescence and fluorescence, thanks to natural 3D-layer structure
- natural play of light, thanks to multifaceted surface texture

Indications

For highly efficient digital fabrication of full dentures with all common open CAM and 3D printing systems

prosthetics concepts

Patient-specific design options, thanks to VITA libraries with the largest variety of setup concepts, including bite class/position (buccal, lingual, Cross bite, Prof. Dr. A. Gerber).

Shades and Sets

VITA classical A1–D4®-/bleach shades: 0M1, A1, A2, A3, A3.5, B3, D3

- 8 x upper anterior tooth moulds
- 4 x lower anterior tooth moulds
- 4 x upper & lower posterior tooth moulds

VITA VIONIC® BASE DISC HI

Premium quality PMMA disc for the fabrication of final denture bases.

Product description

VITA VIONIC BASE are pre-colored premium quality PMMA disc for the fabrication of final denture bases.

Features/Benefits

Stable.

High stability, thanks to impact-resistant material.

Highly accurate.

Exceptional fit to the alveolar ridge.

Pink esthetic.

New selection of gingival shades.

Indications

For the manufacture of denture bases for removable dentures.

VITA VIONIC® WAX

Dimensionally stable, temperature resistant, synthetic wax blanks

Product description

VITA VIONIC WAX are Dimensionally stable, temperature resistant, synthetic wax blanks for the fabrication of wax setups.

Features/Benefits

Comfortable.

Comfortable wax try-in, thanks to fabrication of complete CAD/CAM denture out of wax.

Precise.

Precise wax setup, thanks to precisely milled moulds based on the digital construction.

Easy.

Easy opportunity for correction, since the wax setup can be modified during the try-in.

Indications

Is used for the fabrication of wax try-ins and wax-ups.

VITA VIONIC® FRAME

For the efficient CAD/CAM fabrication of dentures with Ceramill® Motion 2

Product description

VITAPAN EXCELL DD FRAME and VITAPAN LINGOFORM DD FRAME are Denture teeth for the digital prosthetics workflow for CAM modification using the Amann Girrbach Full Denture System (FDS).

Features/Benefits

Easy

Simple, digital reconstruction of function individual design with appropriate concept of occlusion and skeletal class selectable.

Efficient

Efficient full denture fabrication through basal tooth modification by push-button based on the CAD denture design.

Process-proof

Process-secure, fully digital CAD/CAM fabrication thanks to a coordinated material system incl. bonding solution.

Indications

The VITAPAN EXCELL DD FRAME and VITAPAN LINGOFORM DD FRAME denture tooth blanks are machined for the following products using the appropriate Amann Girrbach mills:

- Full and partial dentures

Characteristics

DD FRAME for Ceramill D-set holder system

- used for CAM processing of denture teeth within a tooth frame
- enables milling of the basal and circular parts of the teeth

Shades

- 6 x VITA classical A1–D4® shades A1, A2, A3, A3.5, B3, D3

Shades and Sets

VITAPAN EXCELL DD FRAME

- 9 x upper anterior tooth moulds*
- 4 x lower anterior tooth moulds*

VITAPAN LINGOFORM DD FRAME

- 4 x upper posterior tooth moulds*
- 4 x lower posterior tooth moulds*

*) Each upper/lower set has a special frame with embedded denture teeth.

VITA VIONIC® TRY-IN RESIN

3D printing material for fabricating try-ins.

Features/Benefits

Cost effective

Fast, material-saving and cost-effective fabrication of functional try-ins for partial and full dentures.

Easy to process

Easy to check for fit, function, occlusion and phonetics, as well as easy to polish. Easy individualization for esthetic try-ins possible.

Odorless and long shelf life

Odorless resin that stands out from its competitors due to its long life of three years (Ø BBD two years).

Indications

Individual functional try-ins of complete dentures

Shades

A2

System compatibility

Validated printers:

VITA VIONIC® BASE RESIN IMPACT

Impact-resistant 3D printing material for the fabrication of final denture bases.

Product description

Take 3D printing to the next quality level with VITA VIONIC BASE RESIN IMPACT, an impactresistant printing material for removable denture bases. The excellent impact resistance of the product reduces the risk of breaking under stress.

In addition to the fracture work, the high flexural strength and optimized modulus of elasticity values ensure a balanced property profile, forming the basis for long-lasting dentures.

Features/Benefits

Long lasting

Patients benefit from long-lasting dentures, thanks to the impact resistance of the material, which reduces the risk of breaking under stress. Low plaque adhesion contributes to wearing comfort.

Well balanced

The well-balanced mechanical property profile is impressive in terms of fracture work, flexural strength and modulus of elasticity.

Excellent processing

Short printing times, low shrinkage and high fitting accuracy are just as compelling as the great polishing characteristics.

Indications

For the fabrication of denture bases.

Shades

- pink
- pink translucent

System compatibility

Validated printers:

- ASIGA Max/Mini
- ASIGA Max 2
- ASIGA Ultra
- ASIGA PRO 4K
- Carbon 3D M2
- Formlabs Form4B (open material mode required)
- Rapid Shape ONE, PRO 20, D20+, D30+, D50+

VITA VIONIC® BASE RESIN FLEX

3D-Druckmaterial zur Herstellung flexibler Prothesenbasen

Product description

Die digitale Prothetik bietet heute mehr als nur Totalprothesen: Mit VITA VIONIC BASE RESIN FLEX wird die Herstellung flexibler Teilprothesen für den temporären Einsatz möglich – präzise, effizient und komfortabel. Bringen Sie neue Leichtigkeit in Ihren Laboralltag.

Features/Benefits

Wirtschaftlich

Effiziente, materialsparende und kostengünstige Fertigung flexibler Teilprothesen für den temporären Einsatz – mit reproduzierbarer Qualität und spürbarer Zeitersparnis.

Komfortabel

Flexibles, metallfreies Material mit natürlicher Ästhetik und hohem Tragekomfort. Die transparente Farbgebung lässt die individuelle Zahnfleischfarbe durchscheinen – zugleich bleibt die Prothese reparier- und erweiterbar.

Einfach

Sichere Workflows dank chemischem Haftverbund zwischen Basis und Zähnen, guter Fräsbarkeit und brillanter Hochglanzpolitur.

System compatibility

Validated printers:

- ASIGA Max/Mini
- ASIGA Max 2
- ASIGA Ultra
- ASIGA PRO 4K
- Formlabs Form4B (open material mode required)
- Rapid Shape ONE, PRO 20, D20+, D30+, D50+
- Straumann P Series

Validated post-curing units:

- NK Optik Otoflash G171 N2
- NK Optik Otoflash 250
- Rapid Shape RS cure
- Rapid Shape RS cure XL
- Straumann P Cure

Validated washing units:

- Ultrasonic Bath Bandelin Sonorex
- Rapid Shape RS wash

VITA VIONIC® DENT RESIN

3D printing material for tooth elements in final partial and full dentures.

Product description

Economically printed dental arches and elements that have a high abrasion resistance and remarkable stability, and also meet modern, esthetic demands – VITA VIONIC DENT RESIN makes this possible.

VITA PERFECT MATCH offers shade-stable results:

You can choose from eight VITA classical shades and the bleached shade 0M3. With VIONIC DENT RESIN, you can count on shade accuracy and low susceptibility to discoloration. Good polishing characteristics make the product complete.

Strong and reliable:

Thanks to the finely coordinated material composition, the resins exhibit comparatively high abrasion resistance and remarkable stability. As a result, VITA VIONIC DENT RESIN can be used for both final dentures and temporary crowns/bridges.

A wide range of applications:

Flexible application options are ensured by both the high quality of the materials and the choice of validated workflows with many commonly used dental printers and post-curing units.

Features/Benefits

Esthetic

Available in nine natural-looking, durable shades with a perfect match to the VITA shade guide, reliably meeting the high standards, thanks to the great polishing characteristics.

Durable

The low wear values underscore the quality of the stable and abrasion-resistant restorations.

Versatile

Suitable for permanent denture teeth, as well as temporary crown and bridge restorations, making it highly versatile for use in removable partial and full dentures.

Indications

Permanent denture teeth and long-term provisional crowns and bridges for a wearing time up to 12 months.

Shades

8 VITA classical A1–D4® and one Bleach shade: 0M3, A1, A2, A3, A3.5, B1, B3, C2, D3

System compatibility

Validated printers:

- ASIGA Max/Mini
- ASIGA Max 2
- ASIGA Ultra
- ASIGA PRO 4K
- Carbon 3D M2
- Formlabs Form4B (open material mode required)

VITA VIONIC® BOND

Efficient adhesive bonding of denture teeth with denture bases

Product description

VITA VIONIC BOND is a MMA-based self-curing two-component bonding system for fixation of denture teeth in denture bases. It has a low-viscosity consistency for precise application to the adhesive surface and forms a reactive boundary layer on the adhesive surfaces for a secure bond.

VITA VIONIC BOND is available as a single-dose system (for the bonding of two dental arches) and as VITA VIONIC BOND multiDose (for the bonding of approx. 25 dental arches).

Features/Benefits

Reliable bonding.

Self-curing, two-component system provides a secure bond.

Precise, seamless bonding.

A small film thickness in the cavity makes precise, seamless fixation possible.

Simple and fast.

A fast, clean workflow with a secure bond.

Indications

For permanent bonding of denture teeth from the VITA VIONIC product series in the corresponding cavities of prosthetic bases made of compatible denture base materials.

Content

VITA VIONIC BOND KIT

Contents

1 x 2 ml VITA VIONIC BOND I

1 x 1 ml VITA VIONIC BOND II

3 x Microbrush

Sufficient for bonding approx. 28 denture teeth

VITA VIONIC BOND multiDose COMPLETE

Contents

1 x VITA VIONIC BOND multiDose KIT

1 x VITA VIONIC BOND multiDose measuringcup, 3 ml

1 x Disposablebrush tips, 50 pieces

Sufficient for bonding approx. 25 x 14 denture teeth

VITA VIONIC BOND multiDose KIT

Contents

1 x 20 ml VIONIC BOND I multiDose

1 x 10 ml VIONIC BOND II multiDose

1 x Disposablebrush tips, 50 pieces

Sufficient for bonding approx. 25 x 14 denture teeth

VITA VIONIC® DIGITAL VIGO Denture Tooth Library

Multifunctional tooth geometries for denture design.

Product description

VITA VIONIC DIGITAL VIGO denture tooth library is the extended version of the VITA VIONIC denture tooth library. In addition to the export function for STL data for dentures set up as a monoblock (try-in dentures) and denture base designs, it also allows the export of STL data for the denture tooth elements. These elements can be milled from discs or produced in a 3D printer, as preferred.

Features/Benefits

Flexible

For removable full and partial dentures as well as milled and pressed work.

Largest selection

seven denture concepts, including crossbite, all four bite classes

Efficient

One library for all setup concepts – no switching between different tooth lines. Easy selection of suitable shapes through multifunctional tooth design. Fast and simple adjustment of first suggestions.

Indications

Denture tooth database for denture design in the software (Denture Module for full denture, 28/14)

System compatibility

The VITA VIONIC DIGITAL VIGO denture tooth database is available in 3Shape and exocad.

VITA – perfect match.

VITA

VITA ENAMIC®

The only hybrid dental ceramic in the world with a dual network structure.

Product description

VITA ENAMIC is a monochromatic CAD/CAM block that is available in three translucency levels (T, HT, ST). If you are looking for the perfect inlay, onlay or tabletop material for your daily practice, look no further than VITA ENAMIC ST.

Features/Benefits

Gentle

Chewing force-absorbing material properties ensure gentle protection for the antagonists.

Non-invasive / minimally invasive

Hybrid ceramic enables non-invasive / minimally invasive design with precise wall thicknesses.

Reliable

Stable edges, precise and secure reconstructions, thanks to the secure dual network structure.

Indications

- Anterior and posterior crowns on implants
- Anterior and posterior crowns
- Inlays / Onlays / Partial crowns
- Table tops
- Veneers

These are recommended indications. The entire range of single tooth restorations can normally be fabricated. For details, please refer to the respective instructions for use of the products.

VITA ENAMIC® multiColor

The world's only hybrid ceramic with a dual network structure.

Product description

VITA ENAMIC multiColor is a multichromatic CAD/CAM blank with an integrated color and translucency gradient for esthetic reconstructions at the touch of a button. The state-of-the-art material with a unique dual network structure offers numerous processing advantages.

Features/Benefits

Gentle

Chewing force-absorbing material properties ensure gentle protection for the antagonists.

Non-invasive / minimally invasive

Hybrid ceramic enables non-invasive / minimally invasive design with precise wall thicknesses.

Reliable

Stable edges, precise and secure reconstructions, thanks to the secure dual network structure.

Indications

- Anterior and posterior crowns on implants
- Anterior and posterior crowns
- Veneers

These are recommended indications. The entire range of single tooth restorations can normally be fabricated. For details, please refer to the respective instructions for uses of the products.

VITABLOCS® Mark II

Proven a million times over.

Product description

VITABLOCS Mark II are monochromatic, tooth-colored feldspar blanks that integrate impressively into the remaining tooth substance and are very well suited for processing esthetic reconstructions.

Features/Benefits

Durable

Fabricating reliable restorations from durable materials with very good clinical performance.

Highly esthetic

Makes highly esthetic restorations possible with brilliant shade and light play.

Efficient

Time-saving fabrication and polishing of the restoration without the need for additional firing.

Indications

- inlay
- onlay
- partial crown

These are recommended indications. The entire range of single tooth restorations can normally be fabricated. For details, please refer to the respective instructions for use of the products.

VITABLOCS® TriLuxe forte

The polychromatic feldspar block: Mill. Polish. Done.

Product description

VITABLOCS TriLuxe forte with integrated four-layer shade gradient makes optimized reproduction of the natural play of colors possible in the esthetic zone. Chairside treatments can be performed easily and efficiently in just one session. The four-layer shade gradient also ensures highly esthetic results.

Features/Benefits

Highly esthetic

Four layers for a natural shade gradient and unique esthetics.

Efficient

Simple polishing for optimum gloss.

Durable

High durability, thanks to enamel-like abrasion.

Indications

- highly esthetic reconstructions in the visible region

These are recommended indications. The entire range of single tooth restorations can normally be fabricated. For details, please refer to the respective instructions for use of the products.

VITABLOCS RealLife®

Proven a million times over.

Product description

VITABLOCS RealLife are polychromatic, tooth-colored feldspar blanks with an integrated 3D layer structure that reproduce the natural shade gradient.

Features/Benefits

Durable

Fabricating reliable restorations thanks to a durable material with very good clinical performance.

Highly esthetic

Highly esthetic restorations thanks to a material with superior play of colors and light.

Efficient

Cost-effective reconstruction thanks to time-saving CAM fabrication and efficient finishing using a polishing process.

Indications

- highly esthetic anterior crowns

These are recommended indications. The entire range of single tooth restorations can normally be fabricated. For details, please refer to the respective instructions for use of the products.

VITA SUPRINITY® PC

Glass ceramic. In a natural esthetic.

Product description

VITA SUPRINITY PC is a zirconia-reinforced, high-strength generation of glass ceramics. The glass ceramic is characterized by a particularly fine-grained and homogenous microstructure that facilitates excellent material quality, and a consistently high load capacity and long-term reliability.

Features/Benefits

Highly esthetic

Translucency, opalescence and fluorescence create an outstanding play of color and light.

Highly accurate

Simple processing, thanks to good polishing characteristics and high firing stability for accurate results.

Reliable

A zirconia-reinforced glass-ceramic matrix ensures a high level of safety for reconstructions.

Indications

- Posterior crown
- Anterior crown
- Implant-supported crown
- Veneer

These are recommended indications. The entire range of single tooth restorations can normally be fabricated. For details, please refer to the respective instructions for use of the products.

VITA YZ® MULTI TRANSLUCENT

The premium zirconia. Perfect esthetics with multi-gradient technology

Product description

VITA YZ MULTI TRANSLUCENT represents the latest generation of premium zirconia.

It combines the best of two zirconia raw materials and offers a consistent shade, translucency and strength gradient from the neck to the incisal area. Users no longer have to choose between different materials. The wide range of applications provides maximum efficiency and greater flexibility.

Features/Benefits

Versatile solution

This high-strength and versatile solution is the ideal choice for a wide range of indications, including implant-supported bridges with up to 14 units.

Multi-gradient technology

The multi-gradient technology makes it possible to achieve a natural shade and translucency gradient with a PERECT MATCH to the VITA shade guide.

Multi-performance material

The innovative material guarantees stress-free sintering, a highly precise fit and exceptional edge stability.

Indications

- Fully and partially veneered single-tooth full anatomical crowns – up to 14-unit bridge in the anterior and posterior tooth region
- Single-tooth and up to 14-unit bridges on screw-retained restorations applied directly in the anterior and posterior tooth region
- Inlays, onlays, veneers
- Partial crowns
- Occlusal veneers (table tops)

* further information can be found in the Instructions for use.

VITA YZ® XT Multicolor

The system solution for precise, efficient and true-to-shade zirconia reconstructions.

Product description

VITA YZ XT are extra translucent ZrO_2 blanks for the production of monolithic and partially veneered anterior tooth restorations.

VITA YZ XT blanks are available in several versions:

- VITA YZ XT^{White} (unstained)
- VITA YZ XT^{Color} (monochromatic, tooth shades)
- VITA YZ XT^{Multicolor} (polychromatic, tooth shades)

Features/Benefits

- reliably reproduce tooth shades using a material system with ideally matched components
- create highly accurate restorations with material blanks with edge stability, homogeneous microstructures and tested sintering properties
- achieve efficient, solid and esthetic results thanks to tooth-shaded precolored (multi)color blanks with good shade matching to the VITA classical A1–D4 shade guide

Indications

- Fully-anatomical single-tooth crowns and up to 3-unit bridges
- Fully and partially veneered single-tooth crowns and up to 3-unit bridge superstructures in the anterior and posterior tooth region
- Inlays, onlays, veneers
- Partial crowns
- Occlusal veneers (table tops)

Please note

Other variants

The VITA YZ XT material is available in a number of other variants, including:

- White (unstained)
- Color (monochromatic, tooth shades)

VITA YZ® ST Multicolor

The system solution for precise, efficient and true-to-shade zirconia reconstructions.

Product description

VITA YZ ST are super translucent ZrO_2 blanks for the fabrication of monolithic and partially veneered posterior tooth restorations.

VITA YZ ST blanks are available in several versions:

- VITA YZ ST^{White} (unstained)
- VITA YZ ST^{Color} (monochromatic, tooth shades)
- VITA YZ ST^{Multicolor} (polychromatic, tooth shades)

Features/Benefits

- reliably reproduce tooth shades using a material system with ideally matched components
- create highly accurate restorations with material blanks with edge stability, homogeneous microstructures and tested sintering properties
- achieve efficient, solid and esthetic results thanks to tooth-shaded precolored (multi)color blanks with good shade matching to the VITA classical A1–D4 shade guide

Indications

- Fully-anatomical crowns and up to 14-unit** bridges* in the anterior and posterior tooth region
- Fully and partially veneered single-tooth and up to 14-unit bridge** substructures in the anterior and posterior tooth region
- Single-tooth and up to 14-unit bridges* on screw-retained restorations applied directly in the anterior and posterior tooth region
- Inlays, onlays, veneers
- Partial crowns
- Occlusal veneers (table tops)

* Bridges and bridge superstructures with maximum of two adjoining bridge pontics

** VITA YZ ST is limited in Canada to a max. of 6 layers with a max. of two adjoining bridge pontics.

Please note

Other variants

The VITA YZ XT material is available in a number of other variants, including:

- White (unstained)
- Color (monochromatic, tooth shades)

VITA YZ® HT

The zirconium dioxide for precise, efficient and true-to-shade reconstructions.

Product description

VITA YZ HT are highly translucent ZrO_2 blanks for natural, individual, fully veneered substructures.

- White (unstained)
- Color (monochromatic, tooth shades)

Features/Benefits

Reliably

Reliably reproduce tooth shades using a material system with ideally matched components.

High accurate

Create highly accurate restorations with material blanks with edge stability, homogeneous microstructures and tested sintering properties.

Efficient

Efficient, solid and esthetic results, thanks to the pre-colored blanks in tooth shades with a PERFECT MATCH to the VITA classical shade guide.

Indications

- Fully-anatomical crowns and up to 14-unit bridges* in the anterior and posterior tooth region
- Fully and partially veneered single-tooth and up to 14-unit bridge substructures in the anterior and posterior tooth region
- Single-tooth and up to 14-unit bridges* on screw-retained restorations applied directly in the anterior and posterior tooth region
- Primary telescopes

* Bridges and bridge superstructures with maximum of two adjoining bridge pontics

Sorting

VITA CAD-Temp[®] monoColor VITA CAD-Temp[®] monoColor DISC

Perfect solutions for long-term temporary restorations.

Product description

VITA CAD-Temp monoColor is a monochromatic composite made of highly cross-linked acrylate polymer with microfiller for the fabrication of long-term temporary restorations. It can be used to fabricate temporary bridge restorations with up to two pontics and temporary crowns in the posterior region.

Features/Benefits

Long-term stability

Good surface properties ensure high durability and fracture resistance.

Esthetic

Creation of a natural shade effect, thanks to the good light optical properties of the material.

Cost effective

Efficient CAD/CAM fabrication enables the cost-effective production of temporary solutions.

Indications

- Bridge temporaries with up to two pontics
- Crown temporaries in the posterior region

These are recommended indications. The entire range of single tooth restorations can normally be fabricated. For details, please refer to the respective instructions for use of the products.

VITA CAD-Temp® multiColor VITA CAD-Temp® multiColor DISC

Perfect solutions for long-term temporary restorations.

Product description

VITA CAD-Temp multiColor composite blocks and discs are made of highly cross-linked acrylate polymer with microfiller for the fabrication of long-term temporary restorations. The tooth-colored VITA CAD-Temp blanks impress with their natural shade effect, fracture strength and long-term stability.

Features/Benefits

Long-term stability

Good surface properties ensure high durability and fracture resistance.

Esthetic

Creation of a natural shade effect, thanks to the good light optical properties of the material.

Cost effective

Efficient CAD/CAM fabrication enables the cost-effective production of temporary solutions.

Indications

- Bridge temporaries with up to two pontics
- Crown temporaries in the anterior region

These are recommended indications. The entire range of single tooth restorations can normally be fabricated. For details, please refer to the respective instructions for use of the products.

VITA ENAMIC® IS

Impressive solutions for implant-supported restorations.

Product description

VITA ENAMIC IS are blanks comprised of hybrid ceramic, which feature an integrated interface for an adhesive/ titanium base. Available as VITA ENAMIC IS hybrid ceramic (T/HT) for permanent reconstructions.

Features/Benefits

Safe

Safe for implant-supported crowns and mesostructures with masticatory forceabsorbing properties.

Efficient

With integrated interface to an adhesive/ titanium base for faster and safer use.

Indications

Permanent implant-supported abutment crowns (AC) and mesostructures (MS)

These are recommended indications. The entire range of single tooth restorations can normally be fabricated. For details, please refer to the respective instructions for use of the products.

VITA Powder Scan Spray

Product description

VITA Powder Scan Spray is a spray-on, titanium dioxide free and blue coloured pigment suspension with mint aroma for intraoral application (tooth surface) as well as for extraoral use (plaster die / plaster model) for the fabrication of the opto-electronic impression for CAD/CAM restorations.

With the VITA Powder Scan Spray, the tooth or model surface is matted in order to obtain an optimum image with the intraoral camera (e. g. with Sirona CEREC 3 or CEREC AC) and/or with the scanner.

VITA Firing Paste

Product description

VITA Firing Paste is an Ready-to-use, fireproof material for simple and fast fabrication of individual firing trays. The soft, creamy consistency results in exceptional processing characteristics.

Inlays, onlays, veneers and crowns can be easily fixed on platinum pins or directly on the firing tray or fibrous pad.

After firing, the material can be easily removed from the firing object.

VITA ADIVA® IA-CEM

Ultra opaque luting solution for implant restorations.

Product description

VITA ADIVA IA-CEM is an ultra opaque, strongly-masking, dual-curing luting composite for implant prosthetics. It is used for permanent adhesive bonding of (abutment) crowns and mesostructures on adhesive titanium bases and individual titanium and zirconia abutments. There are material-specific, matched bonding agents for the luting composite to ensure durable bonding of the restoration and the abutment.

Features/Benefits

Versatile

Material-specific and process-reliable bonding agents.

Simple

Systematically arranged set for reliable, color-coded practical use.

Efficient

Handy, two-piece set for efficient, daily use in standard tray format.

VITA YZ HT Shade Liquids

For coloring ZrO₂ restorations.

Product description

VITA YZ H SHADE LIQUIDS are liquids for custom coloring of monolithic VITA YZ HT restorations prior to sintering.

VITA YZ HT SHADE LIQUIDS are available in 7 VITA classical A1 – D4 shades and in 7 VITA SYSTEM 3D-MASTER shades VITA YZ EFFECT LIQUIDS for the gingival, cervical and incisal areas.

VITA YZ[®] EFFECT LIQUID

For universal individualization of colored ZrO₂ restorations.

Product description

VITA YZ EFFECT LIQUID are Effect liquids for individual characterization of restorations made of VITA YZ HT White, VITA YZ ST White and VITA YZ XT White after using VITA YZ SHADE LIQUIDS. Available in 11 shades.

Incisal and cusp areas can be individualized using Blue and Grey. Orange and Brown can be used for preparing fissures, or in the interproximal or crown margins.

Enhanced shade adjustment of transitions towards the gingiva is possible with the three shades: Light Pink, Pink and Dark Pink.

VITA – perfect match.

VITA

VITA AMBRIA®

The brilliant pressed ceramic.

Product description

VITA AMBRIA® Press is a highly esthetic press ceramic for natural, lifelike results. In addition to very good shade fidelity and light dynamics, the press ceramic is also characterized by efficient processing.

Features/Benefits

Brilliant Aesthetics

Brilliant, multifaceted play of shade and light, thanks to material with natural translucence, opalescence and fluorescence.

True-to-shade

Reliably reproduce tooth shades, thanks to press pellets with very good shade fidelity and perfectly matched system components.

Efficient

Saves time by reducing the number of processing steps and achieving accurate press results, thanks to ideal matching of material and investment.

Durable

High stability (> 550 MPa), thanks to zirconia-reinforced lithium disilicate ceramic, which enables highly durable restorations.

Not available in all markets. Official approval pending in some markets.

Indications

- veneers
- inlays/onlays
- full/partial crowns
- three-unit bridges, up to the second premolars

VITA

VITA LUMEX® UNIQUE

One Liquid Ceramic. Unique possibilities.

Product description

Transforms monolithic into something unique. The ready-to-use Liquid Ceramic VITA LUMEX UNIQUE enables three-dimensional characterization as well as fast and ultra-thin microlayering on zirconium dioxide, lithium disilicate and feldspar ceramics.

Features/Benefits

Easy handling

The shape, shade and effects are immediately visible when the pastes are applied, and remain unchanged after firing. For reliable results.

Unique esthetics

Monolithic restorations achieve an outstanding esthetic appearance, three-dimensional depth and a natural luster.

Enormous flexibility

Fine shade nuances, detailed structures and delicate details can be achieved with precision, thanks to the flexible consistencies. Ideal for 3D characterization and ultra-thin microlayering.

Indications

Esthetic finalization of monolithic restorations made of (CTE-range approx. 9,0 to 10,5 x 10⁻⁶ K⁻¹):

- Zirconium dioxide
- Lithium disilicate
- Feldspar ceramics

Characterization of partial and full ceramic veneering with suitable dental veneering ceramics** on the following framework materials (CTE-range approx. 9,0 to 10,5 x 10⁻⁶ K⁻¹):

- Zirconium dioxide (partially and fully veneered e.g., with VITA LUMEX AC)
- Lithium disilicate (fully veneered e.g., with VITA LUMEX AC)
- Titanium (Grad 1-5) (fully veneered e.g., with VITA LUMEX AC)
- Feldspar ceramics (partially veneered e.g., with VITA LUMEX AC)

* VITA LUMEX UNIQUE is additionally approved for the combination with DD CubeY HL and DD Cube One ML.

** to be found in document: 10887E VITA LUMEX UNIQUE - approved veneering ceramics.

VITAVM®13

For full veneering of metal frameworks in the conventional CTE range.

Product description

VITA VM 13 is a highly-esthetic, fine-structure feldspar ceramic that is perfectly adapted to the CTE value of conventional bonding alloys (approx. 13.8 – 15.2 $\mu\text{m}/\text{mK}$). Regardless of whether the conventional alloys are cast, milled or sintered.

VITA VM 13 provides a genuine alternative to all-ceramics – and is right at home wherever the masking effect of a metal framework is required.

Features/Benefits

Esthetic

A vibrant play of colors, thanks to enamel-like light refraction and reflection.

Reliable

The extremely homogeneous fine structure reduces the risk of stress cracks and ensures a smooth and sealed surface.

Precise

Outstanding modeling characteristics and stability for fast and accurate application of the ceramic.

VITA VMK Master®

For full veneering of metal frameworks in the conventional CTE range.

Product description

VITA VMK Master is a natural feldspar veneering ceramic for conventional bonding alloys (approx. 13.8 – 15.2 $\mu\text{m}/\text{mK}$).

Regardless of whether the conventional alloys are cast, milled or sintered.

Features/Benefits

Precise

An uncompromising material when it comes to reliability and processing.

Intuitive

Classic and established dentin-incisal layering pattern.

Esthetic

Highly esthetic restorations, thanks to brilliant colors.

VITA NP BOND

Effective CTE buffer between the ceramic and the metal alloy.

Product description

VITA NP BOND improves bonding between metal frameworks and veneering ceramics, particularly in the case of non-precious metal dental alloys, thus providing dental technicians with greater reliability in fabricating veneers that offer superior long-term stability and esthetics.

Features/Benefits

Effektiv

Effective CTE buffer between the ceramic and the metal alloy, particularly in the case of non-precious metal alloys, provides for a stable bond between the framework and the ceramic.

Reliability

Reliable adhesion and ready-to-use paste.

Easy

Very simple handling and high yield.

VITA NP BOND products

VITA NP BOND

Description	Prod. no.
VITA NP BOND PASTE, 5 g	BNPB5

VITA LUMEX® AC

The modern and reliable veneering ceramic for all conventional framework ceramic and titanium.

Product description

VITA LUMEX AC is a leucite-reinforced, glass-ceramic veneering system with an innovative material formula for vivid and reliable results with shade accuracy.

Features/Benefits

Versatile

Simplifies the day-to-day work, thanks to a wide variety of indications.

Reliable

Reliable reproduction of tooth shades with VITA SHADE MATCH formula.

Efficient

Safe and efficient processes are made possible by the high firing stability and proven durability.

Not available in all markets. Official approval pending in some markets.

Indications

Indication range:

- Full and partial veneering of zirconia
- Full and partial veneering of lithium disilicate
- Full and partial veneering of titanium grades 4 and 5
- Partial veneering of feldspar ceramic
- Reconstruction without a substructure

Materials:

- Zirconia substructures
- (CTE approx. 10.0 to 10.5 x 10⁻⁶ K⁻¹)
- Glass-ceramic substructures
- (CTE approx. 9.0 to 10.5 x 10⁻⁶ K⁻¹)
- Titanium substructures
- (CTE approx. 9.0 to 10.5 x 10⁻⁶ K⁻¹)

VITAVM®11

Fine-structure ceramic for individualization of VITA SUPRINITY PC.

Product description

VITA VM 11 is a low-fusing, fine-structure feldspar ceramic that has been specially developed for individualizing restorations made of zirconia-reinforced lithium silicate glass ceramic.*

The perfectly matched CTE values of substructure and veneering materials help minimize stress to ensure superior bonding and veneering reliability that is free of warping.

Features/Benefits

Highly esthetic

The high translucency and warm shades of VITA VM 11, in combination with the opalescent effect of VITA SUPRINITY PC, create highly esthetic restorations with a vivid play of colors.

Reliable

Stress-free and reliable bonding is ensured through a perfect match of both CTE ranges.

Efficient

Thanks to the proven fine structure, its smooth and densely sealed surface can be easily and quickly polished.

Please note

* Can also be used for CELTRA® and CELTRA® CAD FC.
CELTRA is a registered trademark of DeguDent GmbH.

VITAVM®9

Natural fine-structure feldspar veneering ceramic for zirconia frameworks and VITABLOCS Mark II

Product description

VITA VM 9 is a highly-esthetic, fine-structure feldspar ceramic that is perfectly adapted to the CTE value of zirconia frameworks (approx. 10.5, e.g. such as VITA YZ) – regardless of whether they are white, colored or translucent.

It is also recommended for customizing restorations made from VITABLOCS Mark II.

Features/Benefits

Esthetic

A vibrant play of colors, thanks to enamel-like light refraction and reflection.

Reliable

Excellent bonding ensures reliable results

Resistance

The extremely homogeneous fine structure ensures a smooth and sealed surface.

VITAVM® LC & VITAVM® LC flow

Light-curing, microparticle composite for extraoral use with fixed and removable restorations.

Product description

VITA VM LC & VITA VM LC flow are a Light-curing microparticle composite for fixed and removable restorations for extraoral use.

The VITA VM LC product family meets all your expectations when it comes to a veneering composite for the extraoral fabrication of restorations. Whether it's in the form of a paste composite, the low-viscosity flow materials or freely combined, VITA VM LC offers brilliant results.

Features/Benefits

Efficient

Light, individual and for controlled modelling.

Reliable

High material strength, reliable bonding and surface quality.

Esthetic

Reliable shade-taking procedure and reproduction.

Indications

- Full and partial veneering of metal frameworks
- crowns, bridges
- telescopic crowns
- implant suprastructures
- Inlays, veneers

Application areas

- Individualization and layering-over VITA ENAMIC
- Veneering partially yttrium-stabilized ZrO₂ frameworks (CTE approx. 10.5 · 10⁻⁶ · K⁻¹), such as VITA YZ
- Individualization of VITA denture teeth
- Reproduction of gingival areas
- Veneering of removable and partially removable dentures (according to the manufacturer's information) made of
 - polyether ether ketone (PEEK) with a filler content of up to 20%, such as BioHPP/Bredent
 - PEEK-OPTIMA® LT1 polymer, such as, Juvora, InnoBlanc Medical

Long-term temporaries:

- Individualizing and layering-over long-term temporaries made from VITA CAD-Temp
- Metal-free crowns and three-unit anterior bridges made from VITA VM LC

Shades

Available in VITA SYSTEM 3D-MASTER® and VITA classical A1–D4® shades

VITAVM® LC PRIMER

The bonding agent for light-curing veneering composites.

Product description

VITA VM LC PRIMER is a bonding agent for extraoral surface conditioning. As a two-step bonding agent system, VITA VM LC PRIMER enables reliable bonding between veneering composites and dental substructure materials.

VITA VM LC PRIMER I & II can also be used separately with specific materials. However, when combined, they enable even more effective bonding. When doing so, follow the recommended indications.

Features/Benefits

Economic

Economic advantage, thanks to a variety of indications.

Dependable

Dependability, thanks to strong bonding.

Reliable

Process reliability, thanks to simple handling.

Indications

- Adhesive bonding of metal substructure surfaces (non-precious metal alloys, PM alloys, titanium) with (meth-)acrylate-based resins/composites
- Adhesive bonding of ZrO₂ substructure surfaces with (meth-)acrylate-based resins/composites
- Adhesive bonding of cross-linked composites/resins, such as VITA CAD Temp or of high-performance polymers (PEEK, PEKK)

VITAVM[®]CC

Filler-free cold-curing polymer resin for extra-oral fabrication.

Product description

VITA VM CC is a filler-free, cold-curing polymer resin for extraoral fabrication of temporary restorations and repairs.

Indications

- Fabrication of temporary crowns and bridges
- Fixation of VITA denture teeth, e.g. on CoCr structures
- Repairs
- Covering of attachments in combined restorations

Liquids for Veneering Materials

Product description

Modeling liquids for outstanding stability when layering dental ceramics.

Liquids for Veneering Materials products

Liquids for Veneering Materials

Description		Prod. no.
VITA MODELLING LIQUID 30M, 250 ml For mixing dentine and enamel materials when modeling VITA porcelains for long periods with firing temperatures of over 900°C		B30M250
VITA MODELLING LIQUID 30M, 50 ml For mixing dentine and enamel materials when modeling VITA porcelains for long periods with firing temperatures of over 900°C		B30M50
VITA HIGH SILVER MODELLING LIQUID, 50 ml Anti-greening liquid for high silver content alloys with a silver content of more than 30 %		BHSM50
VITA LUMEX AC MODELLING LIQUID, 250 ml		BLML250
VITA LUMEX AC MODELLING LIQUID, 50 ml		BLML50
VITA MODELLING FLUID, 250 ml Standard modeling liquid For mixing VITA VM 13, VMK Master- and TITANKERAMIK powders		BMF250
VITA MODELLING FLUID, 50 ml Standard modeling liquid For mixing VITA VM 13, VMK Master- and TITANKERAMIK powders		BMF50
VITA MODELLING FLUID RS, 250 ml Special modelling liquid for modelling over an extended period For mixing any dentin, incisal or additional materials. Its smooth consistency allows extended and wet processing while also ensuring good stability. This fluid is perfectly suited for use in larger restorations or multi-unit bridges.		BMFRS250
VITA MODELLING FLUID RS, 50 ml Special modelling liquid for modelling over an extended period For mixing any dentin, incisal or additional materials. Its smooth consistency allows extended and wet processing while also ensuring good stability. This fluid is perfectly suited for use in larger restorations or multi-unit bridges.		BMFRS50
VITA VM MODELLING LIQUID, 250 ml Standard modeling liquid For mixing VITA VM 7, VM 9, VM 13 BASE DENTINE, TRANSPA DENTINE, ENAMEL and EFFECT materials		BML250N
VITA VM MODELLING LIQUID, 50 ml Standard modeling liquid For mixing VITA VM 7, VM 9, VM 13 BASE DENTINE, TRANSPA DENTINE, ENAMEL and EFFECT materials		BML50N
VITA OPAQUE FLUID, 250 ml For mixing opaque and bonder For mixing VITA VMK Master- and TITANKERAMIK powders		BOF250

Description		Prod. no.
VITA OPAQUE FLUID, 50 ml For mixing opaque and bonder For mixing VITA VMK Master- and TITANKERAMIK powders		BOF50
VITA VM PASTE FLUID, 15 ml To change the consistency of OPAQUE PASTE and COLOR OPAQUE PASTE For mixing VITA VM 13 and VM 15 OPAQUE pastes		BPF15V1
VITA PASTE OPAQUE LIQUID, 15 ml To change the consistency of VITA paste opaques and paste bonders		BPOL15
VITA Die Release, 16 ml Separator (ceramic/plaster) for use with VITA ceramics (except TITANKERAMIK)		BSI16
VITA LOW FUSING MODELLING LIQUID, 50 ml Special mixing fluid for low-melting ceramic Liquid for mixing the VITA VM 11 TRANSPA DENTINE, SUN DENTINE, ENAMEL and additional materials		BVMLF50
VITA VM OPAQUE FLUID, 250 ml For mixing opaque powder For mixing VITA VM 13 and VM 15 OPAQUE materials		BVMOF250
VITA VM OPAQUE FLUID, 50 ml For mixing opaque powder For mixing VITA VM 13 and VM 15 OPAQUE materials		BVMOF50

VITA SPRAY-ON

Product description

VITA SPRAY-ON is used to spray dental ceramic powder opaque materials onto metal alloy and titanium substructures. A compressed air spray gun is used to spray on a uniformly thin covering layer of opaque material. Materials which have already been mixed can be kept in the glass bottles supplied with the system until they have been completely used up. Adaptors of varying diameters are supplied for connection to suction units.

Features/Benefits

Efficient

Extremely time-saving and considerably reduces costs

Resistant

Produces a uniform and extremely thin covering

Dependable

Achieves optimal bonding with metal framework

VITA – perfect match.

VITA

VITA LUMEX® UNIQUE

One Liquid Ceramic. Unique possibilities.

Product description

Transforms monolithic into something unique. The ready-to-use Liquid Ceramic VITA LUMEX UNIQUE enables three-dimensional characterization as well as fast and ultra-thin microlayering on zirconium dioxide, lithium disilicate and feldspar ceramics.

Features/Benefits

Easy handling

The shape, shade and effects are immediately visible when the pastes are applied, and remain unchanged after firing. For reliable results.

Unique esthetics

Monolithic restorations achieve an outstanding esthetic appearance, three-dimensional depth and a natural luster.

Enormous flexibility

Fine shade nuances, detailed structures and delicate details can be achieved with precision, thanks to the flexible consistencies. Ideal for 3D characterization and ultra-thin microlayering.

Indications

Esthetic finalization of monolithic restorations made of (CTE-range approx. 9,0 to 10,5 x 10⁻⁶ K⁻¹):

- Zirconium dioxide
- Lithium disilicate
- Feldspar ceramics

Characterization of partial and full ceramic veneering with suitable dental veneering ceramics** on the following framework materials (CTE-range approx. 9,0 to 10,5 x 10⁻⁶ K⁻¹):

- Zirconium dioxide (partially and fully veneered e.g., with VITA LUMEX AC)
- Lithium disilicate (fully veneered e.g., with VITA LUMEX AC)
- Titanium (Grad 1-5) (fully veneered e.g., with VITA LUMEX AC)
- Feldspar ceramics (partially veneered e.g., with VITA LUMEX AC)

* VITA LUMEX UNIQUE is additionally approved for the combination with DD CubeY HL and DD Cube One ML.

** to be found in document: 10887E VITA LUMEX UNIQUE - approved veneering ceramics.

VITA AKZENT® Plus

Optimizes everything. Effortlessly.

Product description

VITA AKZENT PLUS materials are fluorescent ceramic stain materials that can be used for internal coloring during layering, or external stain-glazing and glazing, regardless of the CTE.

The stains and glazes are available in different formulations, as a powder, paste or spray.

- For internal shade modification and external characterization
- Can be thinned and mixed with one another or used in the pure form
- For shade adaptation and shade adjustment
- Suitable for firing temperatures from 750 °C to 950 °C.

Features/Benefits

Easy

This system comprising stain glazing, masking and glazing shades guarantees unbeatable freedom for your practice and laboratory.

Reliable

Reliable and reproducible results that are visible even before firing.

Brilliant

Brilliant, homogeneous restoration surfaces, thanks to glaze materials made of particularly fine microstructure ceramic.

Cost effective

High flexibility and cost-effectiveness, thanks to quick and easy adjustment of the shade effect, chroma and color intensity.

Indications

CTE independent - Compatible with all dental ceramic materials:

- CAD / CAM materials (e.g., VITABLOCS, VITA YZ SOLUTIONS)
- All-ceramics (e.g., VITA LUMEX AC)
- Metal ceramics (e.g., VITA VM 13)
- Press ceramics (e.g., VITA AMBRIA)

Possible applications:

VITA INTERNO®

For reproducing the shade effects found in the tooth interior.

Product description

The VITA INTERNO ceramics enable the ceramist to achieve an even more perfect reproduction of in-depth shade effects. The VITA INTERNO porcelains are fine-grained and strongly fluorescent and are distinguished by their shade intensity. These porcelains enable the user to reproduce natural shade effects and obtain an even more perfect match of ceramic restorations to natural teeth.

Features/Benefits

Fine-grained structure

VITA INTERNO materials are very suitable for washing into the ceramic materials thanks to their special structure.

Intensive shades

The shade intensity allows VITA INTERNO to achieve shade effects visible through the overlying layers and to create a chroma from the depth of the veneer.

Strong fluorescence

The fluorescence results in high luminosity of the shades and increased light transmission within the ceramic.

Can be mixed with one another

INTERNO materials can be shaded with other INTERNO materials and the shade can also be individualized.

Indications

Can be mixed with all VITA ceramic materials: VITA VM 9, VITA VM 11, VITA VM 13, VITA VMK Master, VMK 95 und VITA LUMEX AC.

VITA AKZENT® LC

Reliable reproduction of individual shade effects.

Product description

VITA AKZENT LC are light-curing composite stains for reproducing individual shade effects, as well as applying shade corrections.

In addition to offering a variety of nuances, the stain system impresses with efficient and precise shade application and effective shade and gloss retention.

Features/Benefits

Reliable

Reliably true-to-life reproduction of shade facets of natural dentition, thanks to a wide range of brilliant effect stains.

Easy

Extremely simple shade modification with a brush stroke, thanks to chroma shades for plannable, systematic control of chromaticity.

Efficient

Efficient processing, thanks to shade effects with pinpoint precision or highly efficient shades applied across a large surface area with ideally matched viscosities.

Indications

Universal light-curing stain/glaze system for extraoral characterization of:

- Restorations made of hybrid ceramic (VITA ENAMIC)
- Restorations made of light-curing veneering material (e.g., VITA VM LC)
- Restorations made of CAD/CAM composites (e.g. VITA CAD-Temp, VITA VIONIC DENT DISC multiColor)
- Prefabricated teeth
- Denture bases (e.g. VITA VIONIC BASE)
- Restorations and denture bases made of 3D-printed acrylic polymers (e.g. VITA VIONIC BASE RESIN IMPACT, VITA VIONIC DENT RESIN)

Shades

Available in 14 effect stains and four chroma stains

VITA

VITA VACUMAT® 6100 M

Reliable firing for all commercially-available materials.

Product description

The VITA VACUMAT 6100 M is a fully-automatic, microprocessor-controlled firing unit. The firing unit is ideal for all dental ceramic firing requirements. The furnace impresses with superb quality and esthetics, and offers outstanding firing results, user safety and convenience. Thanks to its optimum ergonomic design, the furnace takes up a minimum amount of space. Two integrated cooling trays support safe storage of fired objects.

Features/Benefits

Modern furnace technology

Innovative firing technology and high-tech materials inside the firing chamber for even better homogenous heat distribution.

Reliable and long service life

Durable firing muffle – Made in Germany – and reliable electronics for consistently excellent firing results.

Comfort and safety

A wide variety of monitoring and service programs for maximum working convenience, safety and time savings.

Please note

In order to operate the furnace, you will need the VITA vPad comfort or VITA vPad excellence control unit.

VITA VACUMAT® 6100 M**Technical functions**

- Service and monitoring programs, e.g. automatic temperature adjustment before every start of the program, temperature and vacuum control, counter for operating hours of firing muffles
- Power failure protection
- Adjustable vacuum values, adjustable pre vacuum and main vacuum
- Lift monitor, adjustable lift speed
- Freely adjustable lift positions for pre-drying and slow cooling
- Fast cooling to standby temperature

Technical data	
Width	230 mm
Depth	325 mm
Height	445 mm
Weight	15,4 kg
Casing	painted anthracite finish
Chamber diameter	90 mm
Chamber height	55 mm
Firing temperature	max. 1200°C
Power supply	100/110V 50/60Hz 230V 50/60Hz
Power consumption	max. 1.5 kW
Classification	Protection class 1

Accessories (can be purchased separately):

- VITA vPad excellence / VITA vPad comfort
- for the simultaneous operation with one control unit VITA vPad (as from the 2nd furnace), 1 switchbox (Art. no. D65000) is required. The switchbox is suitable for the simultaneous operation of up to 4 firing units.
- Vacuum pump or Vacuum pump II
- VITA MultiPump for supplying up to four firing furnaces with only one VITA vacuum pump

VITA V60 i-Line® PLUS

Superior performance. No compromises.

Product description

The VITA V60 i-Line PLUS focuses on two central aspects: outstanding firing results over a long period of time and intuitive user-friendliness. In its timeless design, the new furnace combines proven quality and modern technology at an attractive price.

Features/Benefits

Productive and time saving

The VITA V60 i-Line PLUS can help you save on costs. Thanks to its robust design and clear focus on functionality, you can increase your productivity and save valuable time.

Intuitive user friendliness

The 7-inch touch display with intuitive operating software makes it quick and easy to use.

Durable design

Thanks to the stable metal housing and durable VITA quartz muffle, you can count on consistent firing results for many years. The timeless design of the firing furnace is guaranteed to shine in every laboratory.

VITA V60 i-Line® PLUS

Technical functions

- Maximum temperature accuracy (plus / minus 2 °C) for optimum firing results
- Convenient operation that saves you time, modest space requirements
- 2 firing object storage trays at the side
- Firing chamber fitted with high quality insulation material
- Quartz firing muffle
- Temperature sensor (platinum / rhodium-platinum)
- Automatic temperature calibration

Technical Data	
Width	260 mm
Depth	420 mm

VITA SMART.FIRE® ADVANCED

Design meets efficiency. The compact furnace for bridges with up to 14 units.

Product description

The VITA SMART.FIRE ADVANCED combines modern design with reliable firing quality. Despite its compact design, it even offers ample space for up to 14-unit bridges – making it ideal not only for your practice, but also for all laboratories. Experience the intuitive, user-friendly operation with everything important at your fingertips, thanks to the convenient accessory drawer.

Features/Benefits

Attractive

Modern design and intuitive operation.

Compact

Space-saving design with large firing chamber.

Efficient

Safe firing process, thanks to controlled linear cooling.

Indications

With firing temperatures of up to 1,200 °C, the VITA SMART.FIRE ADVANCED is suitable for

- the firing of ceramic, stain and corrections
- Glaze firing
- crystallization firings with and without vacuum

Thanks to the pre-programmed firing programs, which are optimally adapted to all common ceramic materials, it not only offers efficient processing, but also esthetically pleasing results.

VITA SMART.FIRE® ADVANCED**Technical functions**

- Service and monitoring programs, e.g. automatic temperature adjustment before every start of the program, temperature and vacuum control, counter for operating hours of firing muffles
- Controlled linear cooling with freely selectable cooling gradients
- Power failure protection
- Adjustable vacuum values, adjustable pre vacuum and main vacuum
- Lift monitor, adjustable lift speed
- Freely adjustable lift positions for pre-drying and slow cooling

VITA VACUMAT® 6000 MP

Reliable firing and pressing for all commercially-available materials.

Product description

VITA VACUMAT 6000 MP is built to guarantee safe and reliable pressing results. This combipress unit combines all the advantages of a modern firing and press furnace with a compact design that sets new standards. VITA VACUMAT 6000 MP features all the programs and functions of VITA VACUMAT 6000 M.

It can also be used to press all commercially-available press ceramics, and is suitable for a wide variety of muffle systems. The automatic detection of the number of pellets that have been used prevents any pressing errors or damage to the firing muffle as a result of an insufficient load (VITA PressControl).

Features/Benefits

- A firing muffle with maximum durability ("Made in Germany") and reliable electronics for consistently excellent firing results
- Automatic prevention of condensation in the firing chamber (**VITA AntiCon**)
- Automatic temperature adjustment to ± 1 °C every time a program is started (**VITA AutoAdjust**)
- An automatic cleaning function (**VITA SpecialClean**)
- **VITA CPress** ceramic press technology developed by VITA that offers fault-free operation
- Automatic press path monitoring as well as automatic detection by **VITA PressControl** of the pressing pellets used
- Controlled fast cooling and energy-saving night mode
- Archiving and management of process data with the **VITA Firing Data System (FDS)**
- Operate up to **four furnaces** using just a single **VITA vPad** control unit
- Use the **VITA MultiPump** to supply up to **four furnaces** with just a single vacuum pump – a simply unique system, patented by VITA

Please note

In order to operate the furnace, you will need the VITA vPad comfort or VITA vPad excellence control unit.

VITA ZYRCOMAT® 6100 MS

Product description

Developed and manufactured entirely in Germany, the VITA ZYRCOMAT 6100 MS delivers the quality and reliability that you have come to expect from VITA. The sintering furnace offers a choice of three sintering modes: HighSpeed, conventional and user-defined, giving you flexibility at all times. Optimized for use with VITA materials, as well as with all commercially available ZrO_2 and Al_2O_3 ceramic dental framework materials, this high-temperature sintering furnace sets the pace in terms of user orientation and ergonomics. An LED light bar and freely-adjustable acoustic alerts, reliably provide information on firing progress even across longer distances. The ventilation system is cleverly designed so that rising heat is safely routed away from the electronics, ensuring long-term protection of the heating and electronic elements.

Features/Benefits

- **Homogenous distribution of heat** inside the sintering chamber
- **Fully automatic calibration** with guaranteed temperature accuracy (**VITA Autoadjust**)
- An extended service life and long-term energy-saving operation
- Gentle sintering of all conventional materials such as white and highly-translucent industrially and manually pre-colored zirconia in all operating modes for consistent and convincing firing results
- HighSpeed sintering under 60 minutes (**VITA HighSpeed**)
- HighSpeed sintering of bridge frameworks with up to 14 units
- Sintering of all ceramic dental framework materials based on ZrO_2 and Al_2O_3
- Gentle, stress-free sintering in all modes through controlled cooling to $400^\circ C$
- Integrated low-temperature pre-drying (**VITA PreDry**) with a seamless transition to the sintering program
- Optional modular system upgrades for greater **flexibility and cost-effectiveness**
- Sintering up to 80 units stacked in two levels
- Archiving and management of process data with the **VITA Firing Data System (FDS)**

Please note

In order to operate the furnace, you will need the VITA vPad comfort or VITA vPad excellence control unit.

VITA ZYRCOMAT® 6100 MS**Technical functions**

- Service and monitoring functions, such as automatic temperature adjustment before each program start, temperature control
- Power outage protection, Lift monitoring
- 4 molybdenum disilicide heating elements for uniform heat distribution - individually exchangeable
- Automatic temperature adjustment upon each program start
- Temperature accuracy: +/- 2 °C
- High-quality electronic components for absolutely reliable timing and program sequences
- Firing chamber lined with high-quality insulating material

Technical data	
Width	315 mm

VITA vPad LITE

Intuitive control, easy start-up.

Product description

The VITA vPad LITE for the VITA firing furnaces and sintering furnaces is characterized by its intuitive navigation, clear menu guidance, and solid technical basis. Ideal for standardized laboratory applications.

Features/Benefits

Intuitive operation

Self-explanatory menu guidance for rapid access, without the need for a familiarization period.

Efficient control

Automated sequences and central control save time and free up space for value-adding activities.

Easy and convenient working

Fast and responsive interface for smooth operation, clear navigation, and precise control in day-to-day operations.

VITA vPad LITE

Technical functions

- Individually configurable desktops providing a personalized and efficient working environment.
- Online firing data transfer ensuring rapid support and optimized processes.
- WLAN connectivity for wireless integration within the digital infrastructure.
- A comprehensive range of service and monitoring functions: automatic temperature adjustment, temperature probe, vacuum monitoring, rapid cooling, night mode, power outage protection, operating hours display for the device and the firing muffle, automatic cleaning.
- Software updates and data transfer of user profiles, firing and device data to other operating components or to a PC.

Technical data	
Width	260 mm
Depth	150 mm
Height	200 mm
Weight	1,6 kg
Casing	plastic
Classification	Protection class 1

Temperature for operation: 10 C to 35 C

Humidity for operation: max. 80% RH

Application area: approved for indoor operation only

VITA vPad PRO

More possibilities, more control.

Product description

In addition to an intuitive navigation system, the VITA vPad PRO controller for VITA firing and sintering furnaces offers additional functions, such as planned program start and flexible connection possibilities. This is ideal for complex processes where efficiency and full control are required - without compromising user-friendliness.

Features/Benefits

Flexible control

Control of up to four firing units with a single device - providing maximum efficiency in the laboratory.

Intuitive operation

Self-explanatory menu guidance for rapid access, without the need for a familiarization period.

Added convenience

Individual control features ensure maximum efficiency in day-to-day operations.

VITA vPad PRO

Technical functions

- Control of up to four firing units with a single device.
- Individually configurable desktops providing a personalized and efficient working environment.
- Timer function for delayed or precisely-planned program start - adapted to your individual workflow.
- Wireless connection to the firing unit for more flexibility and convenience.
- Integrated web-browser for direct access to online content and digital resources.
- Online firing data transfer ensuring rapid support and optimized processes.
- WLAN connectivity for wireless integration within the digital infrastructure.
- A comprehensive range of service and monitoring functions: automatic temperature adjustment before each program start, temperature probe and vacuum monitoring, rapid cooling, night mode, power outage protection, operating hours display for the device and the heating muffle, automatic cleaning
- Software updates and data transfer of user profiles, firing and device data to other operating components or to a PC

Technical data

VITA CERAMICS Polishing Set

For the pre- and high-gloss polishing of all ceramic materials.

Product description

VITA CERAMICS Polishing Sets were developed especially for the two-step polishing of all dental ceramic materials in practices and laboratories. The sets each contain a total of six polishing instruments for pre- and high-gloss polishing.

Features/Benefits

For all ceramic

Feldspar ceramic, glass ceramic, oxide ceramic: All types of ceramic can be polished with just one set.

Simple polishing, excellent performance

With their excellent removal and polishing performance, the instruments are impressive, even in the case of pronounced fissures. Safe use of these clinical instruments is also guaranteed through sterilization.

Long use

VITA CERAMICS Polishing Sets are particularly efficient and durable, due to a high proportion of diamonds and a large usable volume.

Content

VITA CERAMICS Polishing Set clinical:

Includes a total of six instruments for the contra-angle. Includes three instruments each for pre- and high-gloss polishing. All instruments can be sterilized.

VITA CERAMICS Polishing Set technical:

Includes a total of six instruments for the handpiece. Includes three instruments each for pre- and high-gloss polishing.

VITA ENAMIC® Polishing Set

For simple pre- and high-gloss polishing of VITA ENAMIC hybrid ceramic.

Product description

The VITA ENAMIC polishing sets were developed for reliable, efficient and material-specific surface treatment of hybrid ceramic restorations in dental practices and laboratories. The sets include various polishing instruments for pre- and high-gloss polishing. These instruments are suitable for careful and gentle polishing of occlusal surfaces, cusps, fissures and contact points of the restoration and produce surfaces with exceptional gloss.

Features/Benefits

Excellent final results:

High Gloss and plaque-resistant surfaces can be produced with these instruments. Precise concentricity, matched grit sizes and the individual geometries of the instruments guarantee results with superior precision.

Simple and safe handling:

The instruments provide superior material removal performance. Good handling and the use without polishing paste enable simple and fast processing.

Gentle and careful processing:

These instruments were developed specifically for the VITA ENAMIC to ensure gentle and careful polishing, reducing the risk of possible microcrack formation.

Content

VITA ENAMIC Polishing Set clinical:

Includes a total of 6 instruments for the contra-angle; 3 instruments for pre-polishing and 3 instruments for high-gloss polishing.

VITA ENAMIC Polishing Set technical:

Includes a total of 6 instruments for the handpiece; 3 instruments for pre-polishing and 3 instruments for high-gloss polishing.

VITA polishing pastes

Diamond polishing pastes for extraoral high-gloss polishing of ceramic and polymer containing materials.

Product description

VITA Polish Hybrid is a diamond polishing paste for extraoral and final high-gloss polishing of restorations made of VITA ENAMIC hybrid ceramic, composite and polymer.

VITA Polish Cera is a diamond polishing paste for extraoral and final high-gloss polishing of restorations made of dental ceramic materials: feldspar ceramics, glass ceramics and zirconia ceramics.

Features/Benefits

- Both polishing pastes enable quick and reliable high-gloss results. At the same time, the surface texture is preserved.
- The diamond particles are each specifically matched to the material classes. As a result, this improves the surface hardness and reduces the likelihood of plaque accumulation.

Content

VITA Polish Hybrid:

VITA Polish Hybrid polishing paste is very suitable in connection with the polishing of VITA ENAMIC hybrid ceramic, in conjunction with the polishing instruments of the VITA ENAMIC Polishing Sets clinical and technical.

VITA Polish Cera:

VITA Polish Cera polishing paste is very suitable in connection with the polishing of VITA SUPRINITY PC, VITA AMBRIA and VITA YZ, in conjunction with the polishers of the VITA CERAMICS Polishing Sets clinical and technical.

VITA

VITA ADIVA® FULL-ADHESIVE

The fully adhesive bonding system with ideally matched components for material-specific and process-safe bonding of restorations made from various materials.

Product description

The full-adhesive luting system is suitable for luting of all indirect restorations made of feldspar, glass and hybrid ceramics, zirconia, composite and metal.

Features/Benefits

Reliable

Bonding numerous restorative materials with material-specific, matched coupling agents in a dependable way.

Process-proof

Process-proof bonding, thanks to a clearly structured luting set with systematically arranged and color-coded components.

Efficient

All components are easy to access, thanks to the handy, two-piece set in a standard tray.

Content

VITA ADIVA® TOOTH-ETCH

is a 37% phosphoric acid etching gel for etching enamel as preparation for adhesive bonding. Suitable for total-etch and selective-etch techniques.

VITA ADIVA® T-BOND I + II

is a dual-curing bonder system. VITA ADIVA T-BOND provides an excellent bond between the luting composite and etched enamel, as well as dentin.

VITA ADIVA® CERA-ETCH

is a 5% hydrofluoric acid gel used for etching restorations made of feldspar, glass and hybrid ceramics, to achieve a micromechanical bond between the restoration and luting composite.

VITA ADIVA® C-PRIME

is a coupling agent that creates a chemical bond between restorations made of feldspar, glass and hybrid ceramics and luting composite.

VITA ADIVA® ZR-PRIME

is a coupling agent that creates a chemical bond between sintered zirconia restorations and luting composite.

VITA ADIVA® M-PRIME

is a coupling agent that creates a chemical bond between restorations made of titanium, non-precious metal alloys, precious metal alloys and luting composite.

VITA ADIVA® F-CEM

is a dual-curing, full-adhesive composite that's suitable for permanent luting of restorations made of feldspar, glass and hybrid ceramics, zirconia, composite and metal.

VITA ADIVA® OXY-PREVENT

is a neutral-colored glycerine gel used during luting to prevent the formation of an oxygen inhibition layer. Can also be used as a try-in paste.

VITA ADIVA® SELF-ADHESIVE

The self-adhesive bonding system with ideally matched components for material-specific and process-safe bonding of restorations made from various materials.

Product description

The self-adhesive bonding system with ideally matched components is suitable for preparing the restoration material (made from feldspar, glass and hybrid ceramics, zirconia, composite, and metal) for adhesive bonding.

Features/Benefits

Reliable

Bonding numerous restorative materials with material-specific, matched coupling agents in a dependable way.

Process-proof

Process-proof bonding, thanks to a clearly structured luting set with systematically arranged and color-coded components.

Efficient

All components are easy to access, thanks to the handy, two-piece set in a standard tray.

VITA ADIVA® IA-CEM

Ultra opaque luting solution for implant restorations.

Product description

VITA ADIVA IA-CEM is an ultra opaque, strongly-masking, dual-curing luting composite for implant prosthetics. It is used for permanent adhesive bonding of (abutment) crowns and mesostructures on adhesive titanium bases and individual titanium and zirconia abutments. There are material-specific, matched bonding agents for the luting composite to ensure durable bonding of the restoration and the abutment.

Features/Benefits

Versatile

Material-specific and process-reliable bonding agents.

Simple

Systematically arranged set for reliable, color-coded practical use.

Efficient

Handy, two-piece set for efficient, daily use in standard tray format.
