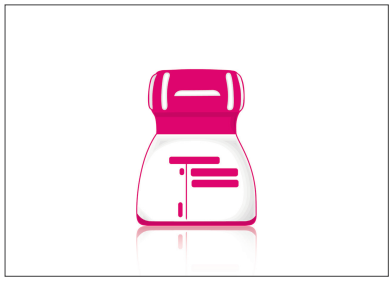
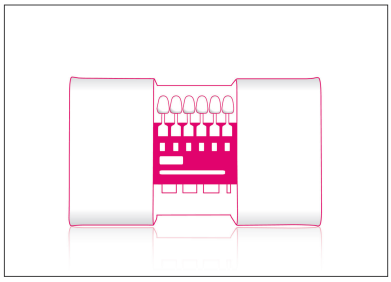
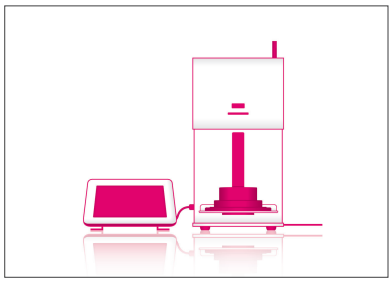
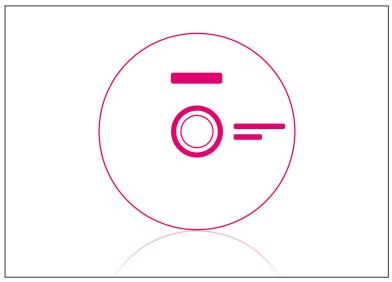
VITA Compendium August 2019
Veneering



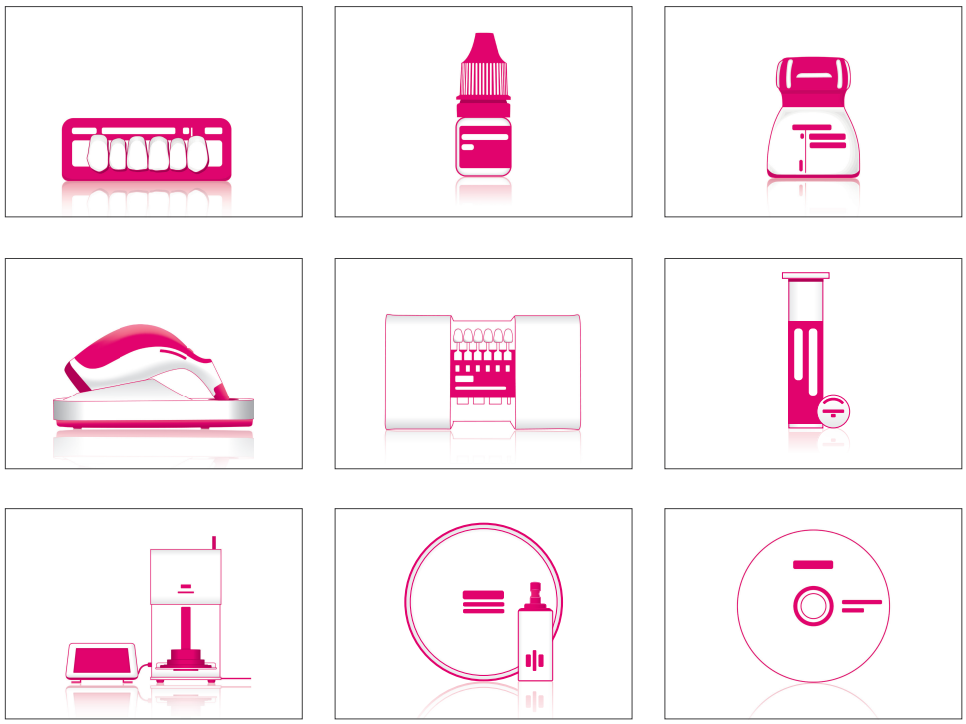






VITA – perfect match.

VITA



VITA – perfect match.

VITAVM®13

For full veneering of metal frameworks in the conventional CTE range

Product description

VITA VM 13 is a highly-esthetic, fine-structure feldspar ceramic that is perfectly adapted to the CTE value of conventional bonding alloys (approx. 13.8 – 15.2 µm/mK). Regardless of whether the conventional alloys are cast, milled or sintered.

VITA VM 13 provides a genuine alternative to all-ceramics – and is right at home wherever the masking effect of a metal framework is required.

The firing temperature (880°C, dentin firing) provides enormous processing reliability, particularly for alloys with a low solidus temperature (<1100°C).

The main components are pure-grade potash and albite feldspar materials that offer brilliant shade effects as well as unbeatable flexural strength values.

Thanks to its homogeneous, compact surface, VITA VM 13 supports outstanding grinding and polishing, particularly in situ. This ensures smooth and densely compact surface results.
Accumulation of plaque on the ceramic surface is significantly reduced, supporting the patient in caring for their high-quality restoration.

VITA VM 13 is a high-quality system component provided by the innovative VITA VM concept – the universal solution for all common indications. Metal-ceramics, all-ceramics or composite: the possibilities are endless!

VITA AKZENT Plus and VITA INTERNO stains are also available for individual finalization.

Features/Benefits

- Natural shade and light effects thanks to the fine structure
- Minimum shrinkage behavior for accurate firing
- Excellent modeling characteristics for fast and accurate application of the ceramic
- Comprehensive range of additional materials for excellent effects
- Efficient and cost-effective processing
- Can be individualized using VITA AKZENT Plus and VITA INTERNO
- Process reliability thanks to long-standing experience
- Available in VITA SYSTEM 3D-Master and VITA classical A1 – D4 shades

VITA VMK Master®

For full veneering of metal frameworks in the conventional CTE range

Product description

VITA VMK Master is a natural feldspar veneering ceramic for conventional bonding alloys (approx. 13.8 – 15.2 µm/mK).

Regardless of whether the conventional alloys are cast, milled or sintered.

Precise and reliable processing.

A master in terms of reliability, suitability for everyday use and esthetics – that's VITA VMK Master.

Features/Benefits

- A material that makes no compromises when it comes to reliability and esthetics
- Precise and reliable processing, allowing it to be learned quickly
- Excellent processing characteristics, such as improved modeling properties, simple handling and minimum shrinkage behavior
- Conventional, established dentin-incisal layering system
- Comprehensive range of additional materials for individualization
- Highly esthetic restorations thanks to brilliant colors
- Available in VITA SYSTEM 3D-Master and VITA classical A1 – D4 shades

VITA TITANKERAMIK

Veneering material for veneering titanium substructures

Product description

The thermal expansion coefficient (COE) and the physical properties of VITA TITANIUM CERAMIC have been perfectly matched with the material titanium. Correct processing ensures reliable bonding between the titanium substructure and VITA TITANIUM CERAMIC.

The dental technician creates brilliant shades with different translucency using perfectly matched materials. VITA TITANIUM CERAMIC fulfills all requirements to achieve fine esthetic results.

Shades

Available in VITA SYSTEM 3D-MASTER and VITA classical A1–D4 shades

VITAVM®15

Low-melting ceramic, especially for veneering high expansion alloys

Product description

VITA VM 15 was developed as a special, low-melting ceramic for veneering high expansion alloys in the CTE range of 16.0 - 17,3 x 10-6 K-1.

Using a modified manufacturing process, a new type of ceramic was created. Unlike conventional ceramics, the structure of this ceramic exhibits particularly homogeneous distribution of the crystal and glass phases after firing - the so-called fine-structure, which is the basis of the outstanding material characteristics of VITA VM 15.

Just like for all VITA VM materials, the layering concept of VITA VM 15 is based on natural teeth and therefore differs clearly from all known layering concepts. The color-bearing BASE DENTINE is the main component and hence the decisive material for the reproduction of the tooth shade.

Features/Benefits

- Comprehensive shade and layering concept
- Outstanding physical and chemical properties such as improved flexural strength or reduced solubility in acids
- CTE especially matched with high expansion alloys
- Optimum processing properties such as good stability and modelling characteristics
- Easy to grind and polish, especially in situ
- Material properties very similar to those of enamel
- Homogeneous and dense surface
- Natural shade effects for a natural, aesthetic appearance
- Compatible with VITA AKZENT Plus and VITA INTERNO porcelains

Shades

Exclusively available in VITA SYSTEM 3D-MASTER shades

VITA NP BOND

Effective CTE buffer between the ceramic and the metal alloy

Product description

Bonder for greater reliability and improved esthetics when veneering non-precious metal dental alloys. Through reliable bonding between the metal framework and the veneering ceramic (such as VITA VMK MASTER and VITA VM 13), VITA NP BOND helps prevent errors occurring as a result of CTE tension between the alloy and the ceramic.

VITA NP BOND (NP: non-precious) improves bonding between metal frameworks and veneering ceramics, particularly in the case of non-precious metal dental alloys, thus providing dental technicians with greater reliability in fabricating veneers that offer superior long-term stability and esthetics.

Features/Benefits

- Effective CTE buffer between the ceramic and the metal alloy, particularly in the case of non-precious metal alloys, provides for a stable bond between the framework and the ceramic
- Improves shade reproduction
- Saves time as firing with WASH OPAQUE is no longer necessary
- Thanks to the improved surface structure following BONDER firing, the opaquer can be applied more easily, effectively and evenly

VITAVM®11

Fine-structure ceramic for individualization of VITA SUPRINITY PC*

Product description

VITA VM 11 is a low-melting, fine-structure feldspar ceramic that is adapted specifically for the individualization of restorations made of zirconia-reinforced lithium silicate glass ceramic. The optimum correspondence of both CTE ranges guarantees a bond that is tension-free, and in turn also reliable.

In combination with lithium silicate-type material, you can begin layering directly without liner firing or washbake, thanks to the excellent surface wettability of the new glass ceramic.

The high translucency and warm shade reproduction of VITA VM 11 combined with the opalescent effect of lithium silicate-type material facilitate highly esthetic results with a vivid play of colors.

Features/Benefits

- Natural shade and light effects thanks to the fine structure
- Excellent bonding ensures reliable results
- Easy handling for fast, highly-esthetic results
- Outstanding firing properties with dimensional stability retained even after repeated firing
- Excellent modeling characteristics for fast and accurate application of the ceramic
- Efficient and cost-effective processing
- Can be individualized using VITA AKZENT Plus and VITA INTERNO
- Process reliability thanks to long-standing experience
- Available in VITA SYSTEM 3D-Master and VITA classical A1 – D4 shades

Please note

* Can also be used for CELTRA® and CELTRA® CAD FC. CELTRA is a registered trademark of DeguDent GmbH.

VITAVM®9

Natural fine-structure feldspar veneering ceramic for zirconia frameworks, VITABLOCS Mark II and PM 9

Product description

VITA VM 9 is a highly-esthetic, fine-structure feldspar ceramic that is perfectly adapted to the CTE value of zirconia frameworks (approx. 10.5, e.g. such as VITA YZ) – regardless of whether they are white, colored or translucent.

In addition, you can also use VITA VM 9 for individualizing restorations made from VITABLOCS MARK II and VITA PM 9 press ceramic pellets.

The main components are pure-grade potash and albite feldspar materials that offer brilliant shade effects as well as optimum physical properties, such as extreme flexural strength values.

Thanks to its homogeneous, compact surface, VITA VM 9 supports outstanding grinding and polishing, particularly in situ. This results in smooth and densely compact surfaces.

Accumulation of plaque on the ceramic surface is significantly reduced, supporting the patient in caring for their high-quality restoration.

VITA VM 9 is a high-quality system component provided by the innovative VITA VM concept – the universal solution for all common indications. Metal-ceramics, all-ceramics or composite: the possibilities are endless!

VITA AKZENT Plus and VITA INTERNO stains are also available for individual finalization.

Features/Benefits

- Natural shade effects, light dynamics and optimum physical properties thanks to the fine structure
- Excellent bonding for reliable results and long-term success
- Minimum shrinkage behavior for accurate firing
- Excellent modeling characteristics for fast and accurate application of the ceramic
- Comprehensive range of additional materials for excellent photo-optic effects
- Can be individualized using VITA AKZENT Plus and VITA INTERNO
- Process reliability thanks to long-standing experience
- Available in VITA SYSTEM 3D-Master and VITA classical A1 – D4 shades

VITAVM®LC

Light-curing, microparticle composite for extraoral use with fixed and removable restorations

Product description
VITAVM®LC & VITAVM®LC flow

Simple to use. Cost-effective and esthetic results. Versatile range of applications: the VITA VM LC product family meets all your expectations when it comes to a veneering composite for the extraoral fabrication of restorations.

Whether it's in the form of a paste composite, the low-viscosity flow materials or freely combined, VITA VM LC offers brilliant results. VITA VM LC is also incredibly similar to ceramic.

Features/Benefits
- Two forms of processing for almost unlimited possibilities
- Perfectly tailored to suit any indication
- Brilliant esthetics with excellent shade reproduction based on the original VITA shade formula
- Outstanding material properties
- System-based, modular product range for efficient design options

Indications
Indication:

- Full and partial veneering of metal frameworks: crowns, bridges, telescopic crowns, implant suprastructures
- Inlays, veneers

Application areas:

- Individualization and layering-over VITA ENAMIC
- Veneering partially yttrium-stabilized ZrO2 frameworks (CTE approx.10.5 · 10-6 · K-1), such as VITA YZ
- Individualization of VITA denture teeth
- Reproduction of gingival areas
- Veneering of removable and partially removable dentures (according to the manufacturer's information) made of
  – polyether ether ketone (PEEK) with a filler content of up to 20%, such as BioHPP/Bredent
  – PEEK-OPTIMA® LT1 polymer, such as, Juvora, InnoBlanc Medical

Long-term temporaries:

- Individualizing and layering-over long-term temporaries made from VITA CAD-Temp
- Metal-free crowns and three-unit anterior bridges made from VITA VM LC

Shades
Available in VITA SYSTEM 3D-MASTER® and VITA classical A1–D4® shades

VITAVM®CC

Filler-free cold-curing polymer resin for extra-oral fabrication

Product description

VITA VM CC is a filler-free cold-curing resin. It is the ideal material for the fabrication of indirect temporary restorations.

VITA VM CC exhibits excellent processing characteristics. Processing is particularly simplified thanks to the exceptional mixing behavior and the superior flow properties.

Accumulation of plaque can be considerably reduced since the material can be easily polished and features a homogeneous structure. The smooth surface of the temporary restoration is pleasant to the patient and offers superior wearing comfort.

Features/Benefits

- Outstanding flowability
- First-rate mixing behavior
- Easy polishing
- Greater color stability than comparable systems
- The ideal combination of bending strength and elasticity modulus ensure
- extreme material stability and lower fracture rates
- Bubble-free curing, with or without pressure pot

Indications

- Fabrication of temporary crowns and bridges
- Fixation of VITA denture teeth, e.g. on CoCr structures
- Repairs
- Covering of attachments in combined restorations

Shades

Available in VITA SYSTEM 3D-MASTER and VITA classical A1–D4 shades

Accessories for Veneering Materials

Product description

The accessories for veneering materials make it easier to process these materials.

Accessories for Veneering Materials products

Accessories for Veneering Materials

Description		Prod. no.
Firing base G (pack of 2 trays and 20 pins) 56 x 45 x 6 mm, with 52 holes for pins		B009N
Fibrous pad firing support, 2 pcs.		B017N
Pins for firing tbase G (pack of 50)		B023
VITA glass spatula for stains		B055
VITA Karat diamond polishing set Contains 5 g diamond polishing paste, 20 diamond felt wheels, Ø 12 mm and 1 nickel-plated mandrel		B068
VITA Karat diamond polishing paste, 5 g		B069
VITA Karat diamond felt wheels, 20 pcs.		B070
VITA Modisol® Insulating pen with 2 tips (ceramic/plaster)		B075N
Brush No. 1 correction brush, red marten		B085
Brush No. 3 layering brush, red marten		B087
Brush No. E 0 staining		B093
Firing tray W for crowns and bridges		B201N
Platinum pins for firing tray W, 6 pcs.		B207N
Mixing spatula, Acrylic for PASTE OPAQUE		B227
VITA Silver Test Set To test the temperature inside ceramic furnaces, contains 6 ceramic sockets and 3 silver rods each 70 mm long and 1.5 mm Ø		B230
		B252
VITA AKZENT Plus mixing plate, crystal glass (70 x 95 mm)		B255V1
Shade indicator for VITA TITANKERAMIK 3D-MASTER Opaque, Opaque Dentine, Dentine, Enamel, Translucent, Window		B264

Description		Prod. no.
Shade guide for VITA TITANKERAMIK INTENSIVE / GINGIVA IN1-IN10, G1-G2		B274IN
Shade guide for TITANKERAMIK MARGIN / COLOR OPAQUE MARN, MAR1-MAR6, CO1-CO8		B274M
Shade guide for TITANKERAMIK TRANSLUCENT / CERVICAL T1-T6, WIN, CE1-CE4		B274T
Shade indicator for VITA TITANKERAMIK classical Opaque, Opaque Dentine, Dentine, Enamel, Translucent, Window		B288
Flat brush, for PASTE OPAQUE		B297
Brush No. 3 a & e		B302
Stain brush tips for a & e brush no. 3/0, 5 pcs.		B303
Brush No. 8 a & e		B304
Tips for a & e brush no. 8, 2 pcs.		B305
Shade indicator for VITA VM 9 3D-MASTER Base Dentine, Transpa Dentine, Enamel, Chroma Plus		B330
Shade indicator for VITA VM 9 classical Base Dentine, Transpa Dentine, Enamel, Chroma Plus		B331
Shade indicator for VITA VM 13 3D-MASTER Opaque, Sun Dentine, Base Dentine, Transpa Dentine, Enamel, Chroma Plus, Neutral, Window, Corrective, Color Opaque		B340
VITA Shade indicator for VITA VM 13 classical Opaque, Base Dentine, Transpa Dentine, Enamel, Chroma Plus, Neutral, Window, Corrective, Color Opaque		B341
Shade indicator for VITA VMK MASTER classical Opaque, Opaque Dentine, Dentine, Enamel, Wash Opaque, Translucent T4, WIN		B342
Shade indicator for VITA VMK MASTER 3D-MASTER Opaque, Opaque Dentine, Dentine, Enamel, Wash Opaque, Translucent T4, WIN		B343
Shade indicator for VITA VM 15 3D-MASTER Opaque, Base Dentine, Transpa Dentine, Enamel, Chroma Plus, Neutral, Window, Corrective		B350
Shade guide for VITA VM EFFECT CHROMA EC1-EC11		B414
Shade guide for VITA VM EFFECT ENAMEL / EFFECT PEARL EE1-EE11, EP1-EP3		B416
Shade guide for VITA VM PROFESSIONAL KIT SMALL EC1, EC4, EC6, EC8, EC9, MM2, EP1, EO2, EE1, EE3, EE7, EE8, EE9, EE10, EE11		B419
Shade guide for VITA VM INDIVIDUAL For creating individual shade indicator plates		B423
Shade guide for VITA VMK MASTER TRANSLUCENT T1-T8, OT1, PLT1		B431
Shade guide for VITA VMK MASTER MARGIN / GINGIVA MN, M1-M5, G1-G5, GOL, GOD		B432

Description		Prod. no.
Shade guide for VITA VMK MASTER DENTINE MODIFIER / LUMINARY DM1-DM8, LM1-LM6		B433
Shade guide for VITA VMK MASTER STANDARD N1-N5, CE1-CE3, COR1, COR2		B434
Shade guide for VITA VM 9 ADD-ON ADD1 - ADD8		B435
VITA AKZENT Plus Shade sample disc		B436
VITA AKZENT Plus mixing plate, acrylic (Ø 144 mm, with indentations)		B437
Shade guide for VITA VM GINGIVA / MARGIN G1-G5, GOL, GOD, M1-M9		B439
Shade guide for VITA VM EFFECT LINER / EFFECT OPAL / MAMELON EL1-EL6, E01-E05, MM1-MM3		B440
Shade guide for VITA VM 11 No. 1 MM1, MM3, SD1, SD2, SD3, EC1, EC5, EC11		B442
Shade guide for VITA VM 11 No. 2 EO1, EO2, EO3, EO5, EP1, EE1, EE3, EE5, EE7, EE8, EE9, EE11		B443
VITA INTERNO Shade sample disc		B444

Description	Prod. no.

Liquids for Veneering Materials

Product description
Modeling liquids for outstanding stability when layering dental ceramics.

Liquids for Veneering Materials products

Liquids for Veneering Materials

Description		Prod. no.
VITA MODELLING LIQUID 30M, 250 ml For mixing dentine and enamel materials when modeling VITA porcelains for long periods with firing temperatures of over 900°C		B30M250
VITA MODELLING LIQUID 30M, 50 ml For mixing dentine and enamel materials when modeling VITA porcelains for long periods with firing temperatures of over 900°C		B30M50
VITA HIGH SILVER MODELLING LIQUID, 50 ml Anti-greeningliquid for high silver content alloys with a silver content of more than 30 %		BHSML50
VITA MODELLING FLUID, 250 ml Standard modeling liquid For mixing VITA VM 13, VMK Master- and TITANKERAMIK powders		BMF250
VITA MODELLING FLUID, 50 ml Standard modeling liquid For mixing VITA VM 13, VMK Master- and TITANKERAMIK powders		BMF50
VITA MODELLING FLUID RS, 250 ml Special modelling liquid for modelling over an extended period For mixing any dentin, incisal or additional materials. Its smooth consistency allows extended and wet processing while also ensuring good stability. This fluid is perfectly suited for use in larger restorations or multi-unit bridges.		BMFRS250
VITA MODELLING FLUID RS, 50 ml Special modelling liquid for modelling over an extended period For mixing any dentin, incisal or additional materials. Its smooth consistency allows extended and wet processing while also ensuring good stability. This fluid is perfectly suited for use in larger restorations or multi-unit bridges.		BMFRS50
VITA VM MODELLING LIQUID, 250 ml Standard modeling liquid For mixing VITA VM 7, VM 9, VM 13 BASE DENTINE, TRANSPA DENTINE, ENAMEL and EFFECT materials		BML250N
VITA VM MODELLING LIQUID, 50 ml Standard modeling liquid For mixing VITA VM 7, VM 9, VM 13 BASE DENTINE, TRANSPA DENTINE, ENAMEL and EFFECT materials		BML50N
VITA OPAQUE FLUID, 250 ml For mixing opaque and bonder For mixing VITA VMK Master- and TITANKERAMIK powders		BOF250
VITA OPAQUE FLUID, 50 ml For mixing opaque and bonder For mixing VITA VMK Master- and TITANKERAMIK powders		BOF50

Description		Prod. no.
VITA VM PASTE FLUID, 15 ml To change the consistency of OPAQUE PASTE and COLOR OPAQUE PASTE For mixing VITA VM 13 and VM 15 OPAQUE pastes		BPF15V1
VITA PASTE OPAQUE LIQUID, 15 ml To change the consistency of VITA paste opaques and paste bonders		BPOL15
VITA die separating liquid, 16 ml Separator (ceramic/plaster) for use with VITA ceramics (except TITANKERAMIK)		BSI16
VITA LOW FUSING MODELLING LIQUID, 50 ml Special mixing fluid for low-melting ceramic Liquid for mixing the VITA VM 11 TRANSPA DENTINE, SUN DENTINE, ENAMEL and additional materials		BVMLF50
VITA VM OPAQUE FLUID, 250 ml For mixing opaque powder For mixing VITA VM 13 and VM 15 OPAQUE materials		BVMOF250
VITA VM OPAQUE FLUID, 50 ml For mixing opaque powder For mixing VITA VM 13 and VM 15 OPAQUE materials		BVMOF50

Liquids for Veneering resin

Description		Prod. no.
VITA VM LC CLEANER, 50 ml Cleaning solution		CVMLC50
VITA VM LC GEL, 20 ml Inhibition layer blocker		CVMLG20
VITA VM LC MODELLING LIQUID, 10 ml Modeling liquid		CVMLM10
Modeling liquid Modeling liquid		CVMLM30
VITA VM LC SEPARATOR, 30 ml Modeling separator		CVMLS30

Accessories for Veneering resin

Product description

The accessories for veneering acrylics make it easier to process these materials.

Accessories for Veneering resin products

Accessories for Veneering resin

Description		Prod. no.
Measuring spoon, acrylic		C006
VITA Mixing palette black porcelain with lid, 8,5 x 11 cm		C014
Measuring spoon, 0,1 ml / Mixing spatula 2-sided		C017
White brush-holder		FCPHW
Disposable brush heads, 50 pcs.		FCPS

VITA SPRAY-ON

Product description

VITA SPRAY-ON system is for spraying dental ceramic opaque materials onto metal frameworks.
A compressed air spray gun is used to spray on a uniformly thin covering layer of opaque material. Materials which have already been mixed can be kept in the glass bottles supplied with the system until they have been completely used up.

Adaptors of varying diameters are supplied for connection to suction units.

Features/Benefits

- Extremely time-saving
- Produces a uniform and extremely thin covering
- Achieves optimal bonding with metal framework
- Considerably reduces costs
