## VITA AKZENT® Plus

Optimizes everything. Effortlessly.

### Product description

New areas of application call for new, versatile materials. With VITA AKZENT Plus stains, users can optimize the shade of all types of dental ceramic restorations simply and efficiently, regardless of the CTE of the restoration.

No matter whether internal coloration, surface characterization or fine glazing: with the new VITA AKZENT Plus fluorescent stains, you can adapt your restoration easily and without undue effort.

Depending on the user's preferred/customary method of processing and the relevant area of application, VITA AKZENT Plus stains are available as powders and as a ready-to-use pastes.

The glazing BODY STAINS and GLAZE material are also available as a spray, which, thanks to even application, ensures uniform surface treatment across a large area without any wastage as a result of scatter. The new, special spray head allows precise application to specific areas.

### Features/Benefits

For all types of dental-ceramic materials, for the layering and press technique and feldspar ceramic blocks such as VITABLOCS to monolithic restorations. It is suitable for all dental ceramic materials and for every CTE.

Available in three different forms depending on the method of application:

#### POWDER:

for unlimited flexibility and cost-effectiveness

#### PASTE:

ready-to-use pastes with uniform consistency and homogeneous pigmentation

#### SPRAY:

ready-to-use, easy-to-apply glaze and finishing agent stains

### VITA INTERNO®

For reproducing the shade effects found in the tooth interior

#### Product description

The VITA INTERNO ceramics enable the ceramist to achieve an even more perfect reproduction of in-depth shade effects. Outstanding results can be obtained with INTERNO ceramics, particularly when reproducing colour effects (contrasts) occurring in the incisal area of natural teeth. In special cases the INTERNO ceramics can be used to create an additional impression of depth when space is lacking. Their high fluorescence means shades with increased luminosity and even better light transmission - just as in natural dentition.

VITA INTERNO powders are compatible with **all** VITA veneering ceramics.

#### Features/Benefits

- Compatible with all VITA veneering ceramics
- Can be mixed together
- Stain shades are based on shades naturally found on teeth, so complicated mixing is usually unnecessary
- Do not run; colorfast

## VITA ENAMIC® STAINS

Reproducing natural shades in a simple and fast manner

### Product description

The VITA ENAMIC STAINS KIT is comprised of six stains and accessories for the reproduction of natural shade nuances of hybrid ceramic restorations. The stains are bonded to the restoration in a polymerization process. VITA ENAMIC GLAZE, available for surface sealing, increases the durability and brilliance of the shades in the oral environment. Processing is based on a simple step-by-step principle: condition the surface, mix and apply the shades, carry out intermediate polymerization, apply chemical glaze material and perform final polymerization.

### Features/Benefits

#### Fast processing:

Simply apply the VITA ENAMIC stains to the restoration, polymerize and that's it! This way, the shade of VITA ENAMIC restorations can be quickly characterized.

#### High level of individuality:

The anomalies and shade nuances of natural teeth can be individually characterized with the six VITA ENAMIC stains.

#### Simple processing:

The shade intensity of the VITA ENAMIC stains can be perfectly controlled by the ratio of liquid to shade powder. This way homogeneous application of shades is ensured.

### Indications

VITA ENAMIC stains are suitable for the characterization (occlusal/ cervical) of restorations made of VITA ENAMIC hybrid ceramic.

### Shades

Available in six shade nuances: white, corn, brown, khaki, blue and black.

### System compatibility

The following dental and dental-technical polymerization units are recommended for intermediate and final polymerization: Bluephase C8 (Ivoclar Vivadent), Astralis 10 (Ivoclar Vivadent), Valo LED (Ultradent), Speed Labolight (Hager & Werken), Heraflash (Heraeus Kulzer) and Polyflux PT (Dreve).
